OVISO®

Design Daniel Kübler

Light is never thought through to the end: Reinventing light aesthetics means thinking far beyond form, function and technological progress. The result, from RIBAG, is OVISO® – the world's first range of OLED lights, defining the light of tomorrow. Not only does OVISO® combine high light quality with an exclusive standard of design, it also enables completely new lighting concepts. OVISO® is light in its most beautiful shape.
