Bluetooth Integration

As technology advances, so do our luminaires. As a result, we always ensure that you will continue to have the best quality of light.

With the introduction of Casambi bluetooth into our luminaires, we are enhancing the user experience and bringing our Faze luminaires to the next level.

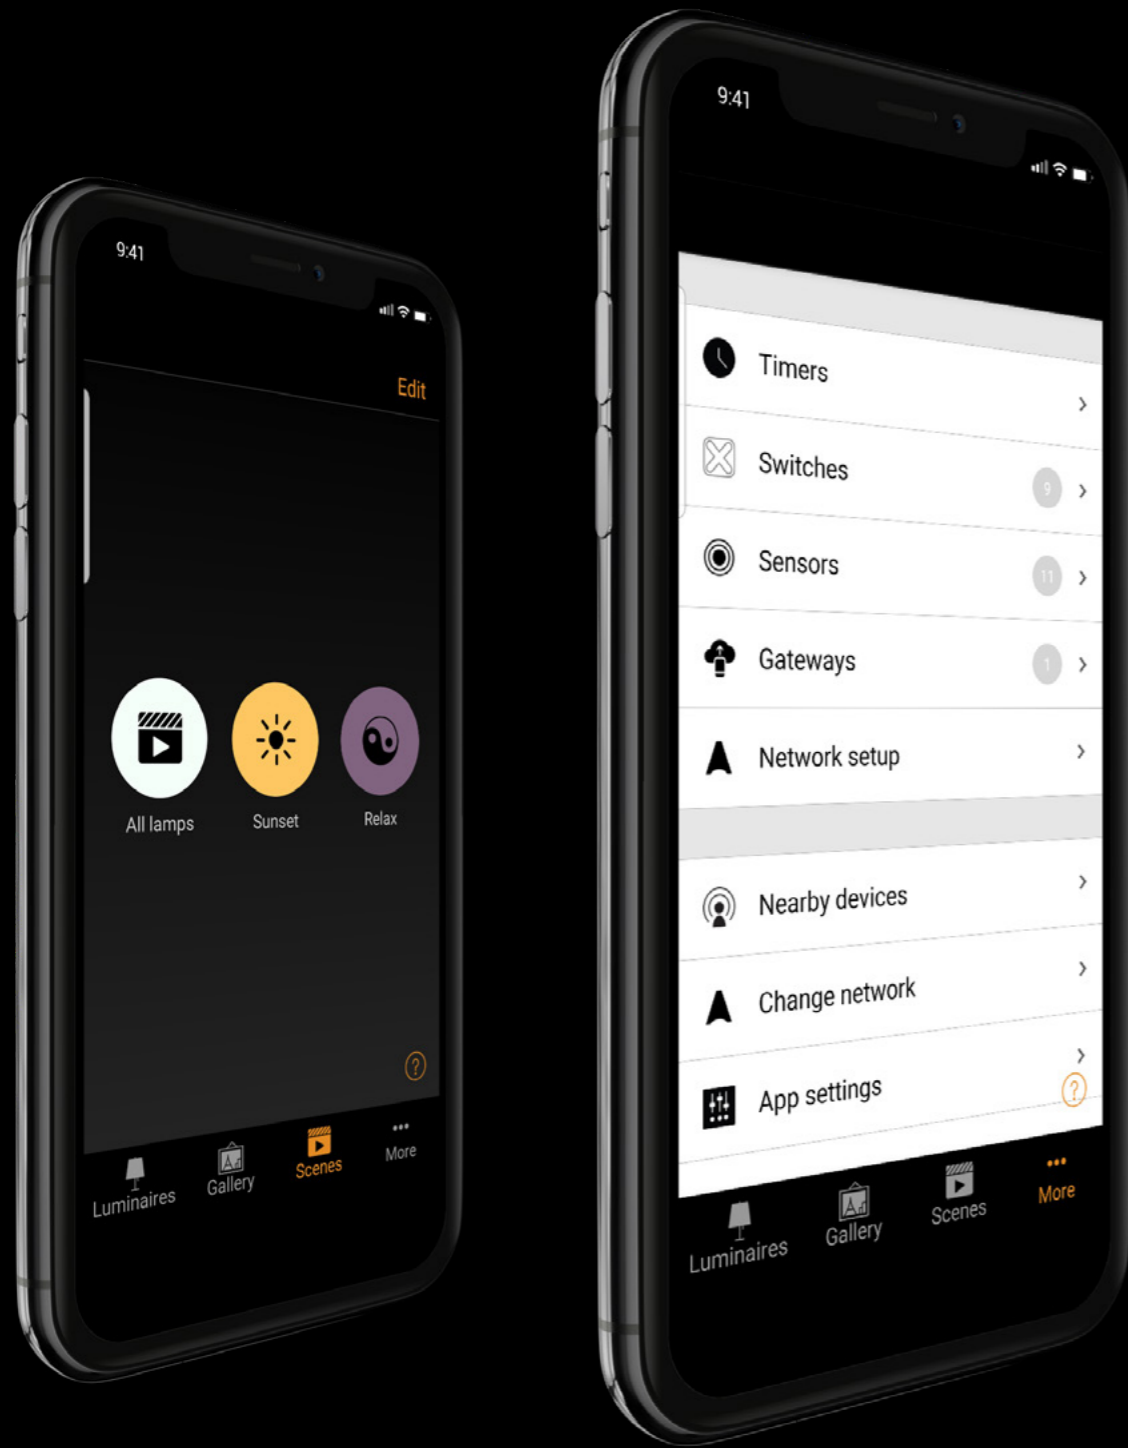

Casambi is based on Bluetooth Low Energy (BLE), the state-of-the-art wireless technology and the only low power wireless technology in all modern devices. With this, Casambi creates a self-organizing wireless mesh network, where each module has the intelligence of the system replicated inside it, creating a system with no single points of failure.

With this complete control over your lighting via your mobile device, Casambi Bluetooth makes lighting control easier and more efficient than ever before.

An Introduction to Casambi

The Casambi app is an all-in-one lighting control system. Allowing complete access to lighting manipulation through Bluetooth on your phone, the Casambi app gives you complete control over your lighting. Available to download from the Apple App store and Google Play, it is the simplest solution to controlling your lighting.

Key Features of Casambi

- 
Scenes
 Create Lighting to suit a specific event or space.
- 
Colour Change
 Change the colour on any RGB or RGBW light fittings. The ability to select an individual colour from a colour wheel.
- 
Day Light Sensor
 When a sensor is installed, Casambi has the ability to detect when sunlight is present and deactivate the artificial light source. This is a great energy saver and helps ensure the longevity of your luminaires.
- 
Gallery
 Take a photo of a room or upload a floor plan and mark the positions of the luminaires. The images are then displayed in a gallery with the luminaires shown and you can simply tap the one you would like to control.
- 
Sunrise and Sunset
 The ability to calculate and detect sunrise and sunset via your phones network and GPS location. The app can then adjust your artificial light according to the natural light present.
- 
Parameters
 Specific data can be read about the light fitting. This data could be LED options, power consumption or driver versions installed.
- 
Calendar and Timer
 The app can turn your lights on and off based on a set time or date chosen by you.
- 
Animations
 The ability to create lighting animations through dimming and colour changing sequences.
- 
Grouping
 Group together multiple light fittings and control dimming and switching all at once.
- 
Motion Sensor
 When a motion detector is installed, Casambi has the ability to activate or deactivate the lights when movement is detected.
- 
Scalability
 The Casambi app is suitable for small or large scale spaces, whether it's a bedroom or an office, Casambi has a boundless network system.
- 
Elements
 Casambi partners have the ability to make unique, company specific features and products within the Casambi ecosystem. The products that can be developed could be controlling blinds, curtains, doors, or any relay equipped technology. This functionality also makes it possible to control luminaires with motors.

Casambi Setups

Through various components and control options, the Casambi system allows users to integrate Bluetooth into their current lighting installation or to create a lighting installation with Bluetooth from scratch.

How to Connect

Casambi External Unit

Regular Driver

Luminaire

Casambi Driver

Luminaire

External Casambi unit

For existing installations or fittings with a built-in driver, an external Casambi unit is required. This unit connects to the current driver and is a cost effective way of making a current installation Bluetooth compatible.

Driver with a built-in Casambi unit

For new installations it is best to use a driver with a built in Casambi unit. This allows for a direct connection to the luminaire and a simple installation process.

Examples of Casambi Bluetooth setups

① Fittings with individual Casambi drivers

1. Luminaire

2. Casambi Driver

3. Sensor (Optional)

4. Casambi App

5. Casambi BasicDIM Wireless Switch (Optional)

This can be any of our compatible luminaires. In this example is a Faze Pro downlight.

This is the driver which has the Casambi unit built into it.

Sensors are an optional addition to your setup. These will allow for the motion based features in the Casambi app.

Available to download on Apple App store or Google Play, the Casambi app is the complete guide and controller to your Casambi Bluetooth setup.

The Casambi BasicDIM Wireless Switch is a wireless controller, providing an alternative to using the app on your phone. It comes with a magnetic base, making it simple to mount to any wall or surface.

Casambi Dimmer Module

Casambi Dimmer Module is a Bluetooth controllable, Casambi enabled trailing-edge dimmer for operation of incandescent lamps, dimmable LED lamps and dimmable LED control gear.

PRODUCT CODE	
Casambi Dimmer Module	71-CASCBU
Casambi Dimmer Module (With CBU box)	71-CASCBUBOX

GENERAL SPECIFICATIONS	
Voltage Range	85-240 VAC
Max. Output Current	0.65 A
Dimming Method	Trailing-edge phase control
Max. Output Power	150 VA @ 230 VAC 75 VA @ 120 VAC
Min. Load Requirement	1W
Max. Inrush Current	10 A, 100 ms
IP	20
Dimensions	40.4 x 36.3 x 14.0 mm
Lifetime	Up to 100,000hrs
Warranty	5 Years

COMPATIBLE FITTINGS	
FAZE	All Faze fittings, excluding LED Strip.

FEATURES	
Available with or without CBU box.	
Trailing Edge Dimming.	
Can be controlled with Casambi app, available for iOS and Android devices.	
Can be installed behind a traditional wall switch, inside a luminaire or into a ceiling outlet box.	
Able to control up to 150 VA at 230 VAC.	
Features an overcurrent and over temperature protection.	
Dimmer module box comes with easy access lid for connecting supply on site.	
Loop in - loop out push fit connectors 20 to 12 AWG	

Casambi BasicDIM Driver 11W

Dimmable built-in constant current LED Driver, for use with our 11W downlights.

PRODUCT CODE	
Casambi BasicDIM Driver 11W	71-CAS300

GENERAL SPECIFICATIONS	
Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 - 264 V
DC Voltage Range	176 - 280 V
Max. Power Control	17W
Output Current	Set at 300 mA
Dimming Range	1 - 100%
IP	20
Dimensions	130 x 43 x 30 mm
Lifetime	Up to 50,000hrs

The Benefits of Bluetooth

There are a lot of benefits to having Bluetooth included in your lighting setup. The Casambi Bluetooth system will help you in many ways, including both with time and energy saving.

Time Saving

You can save a significant amount of time by pre-setting all of your lighting to your specific schedule.

Energy Saving

With Casambi's day light sensors, motion sensors and sunrise/sunset detection, you will save a significant amount of energy in your home without even having to think about it.

Cost Saving

With all the energy saving from automatic shut off, you'll reduce the costs of power significantly, as well as the costs of future light replacements from excess use.

A Step Forward In Technology

By having a Casambi Bluetooth network in your home, as technology progresses, so will your day to day life. With Casambi technology moving forward into other Bluetooth devices such as shutters, curtains and doors, eventually the majority of your home will be accessible via your Casambi Bluetooth network.

Examples of Bluetooth layouts

When applying Bluetooth to your lighting plan, it is essential that you ensure the Bluetooth layout caters to all of your needs. These are some examples of how Casambi Bluetooth can be applied and bring enhanced lighting options into your home.

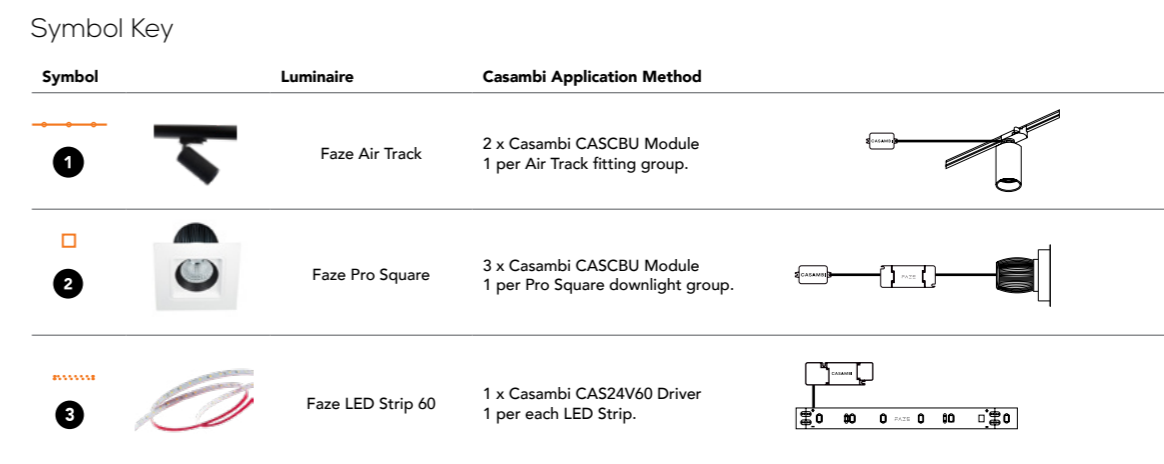

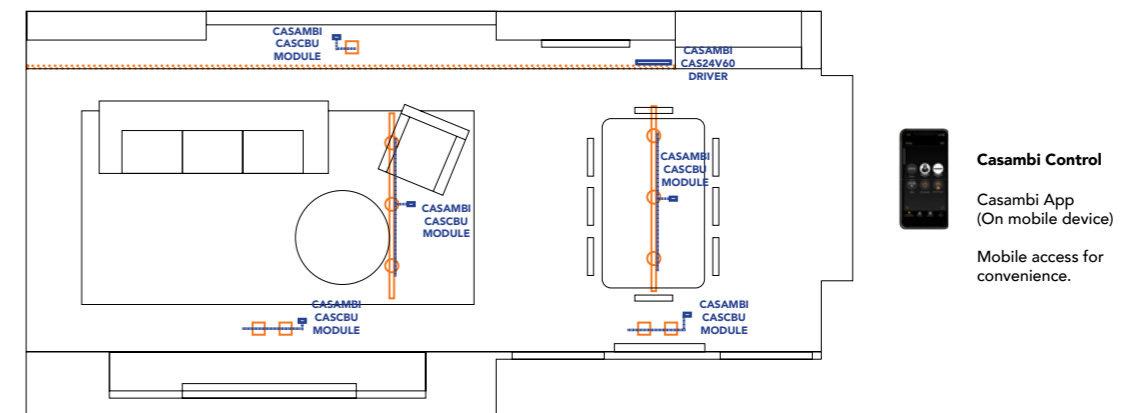

Bathroom Application

By applying Casambi to this bathroom, you can control the light to suit your needs. In this example we have used separate controls on the LED strip and one control on the four downlights. By doing this, if you wanted to take a relaxing bath you could have the perfect ambient lighting by having the downlights off, the LED strip around the mirror off, and the LED strip above the bath on and dimmed down to about 30%.

Living and Dining Room Application

In this example the Bluetooth application has been used to enhance the experience of the living room and dining area. By incorporating the following application method, an activity such as watching TV can be enhanced by individually controlling the lighting. Whilst watching TV you could have the downlights above the TV off, the track lighting and LED Strip dimmed and the feature downlights left on, to create the perfect ambience. This can all be done via the Casambi app, whilst from the comfort of your couch.

Kitchen Application

In this example Casambi has been applied to enhance the light whilst cooking and entertaining, as well as power saving when the kitchen is not in use. Whilst cooking you may decide to have all of the lights on, however when entertaining, choose to turn off the rear LED strip so as not to light unnecessary space. If moving to another area, you could dim the downlights to 10%, leaving the counter top featured under the accent light of the Silo.
