FAZE

The brand

Faze is a brand of Radiant Lighting with over 30 years at the forefront of lighting quality, innovation and design.

As lighting designers, we understand light and what can be achieved using well designed luminaires that are made from the best components.

Based in Perth, Faze has grown into a truly international brand, as we source the best quality materials from Japan, Germany and Italy. Also with a new state of the art production facility in China, we create the best quality luminaires that will stand the test of time. With sustainability in mind, we also do our best to produce luminaires that are environmentally conscious; strategically designing them with components that can be replaced and added to over time.

We take our commitment to quality and compliance very seriously, ensuring that we always meet and exceed the highest possible standards. With a new cutting-edge testing and compliance facility based at our head office in Perth, we are now leading the way with quality in everything that we do.

We collaborate with architects, designers and builders every single day to incorporate light into their projects. This helps us understand the market and create truly unique and innovative luminaires.

The continued advancement in LED technology provides us with so many opportunities to expand and grow our brand, as well as the ability to make sure that every product stamped with the Faze logo has the best optical performance and optimal visual comfort, no matter what the project.

Faze aims to create unique designs, providing many lighting solutions and endless design possibilities with it's luminaires.

# Contents

Our Development Strategy

Our development strategy is the core of our brand. We focus on having a strong design foundation, ensuring our luminaires are designed, tested and developed with the up-most care and accuracy; so that you receive the best quality lighting.

Faze Development Process

Concept.

Each product design is sparked by an idea or gap in the market, which is then sketched out for planning.

Refined Illustration.

We then use software to complete a refined drawing and 3D render of the product.

Sourcing Materials.

The next stage is sourcing the best materials for each particular product. This includes the LED chip and driver.

Cultivated Design and Development.

Based on all testing and revision, each fitting is developed and improved. All changes that are made, ensure that each fitting is of the highest quality for final production.

Revision and Performance Testing.

The sample is then revised and tested to ensure it meets the required standards and is functional as well as aesthetical.

Prototype Engineered.

A prototype is engineered based on the concept drawing, using carefully sourced materials.

Packaging Design and Instructions.

Once the final details and measurements are confirmed, the packaging and instructions are then individually tailored to that product.

We ensure every product has the perfect sized packaging to reduce waste. They are also labelled with all the information you need when on site.

Instructions are also carefully designed and printed, to ensure safe and easy installation.

Australian Standards Testing.

Once the product is produced and packaged, we then do a final test to ensure it meets the Australian standards. As well as ensuring all packaging is correct and ready for dispatch.

The final product is ready to go.

It is then promoted to clients and customers, and stored in our warehouse ready to order.

The Inspiration

Our clients are the focus of everything that we do. From the very first design of each fitting, to the plan for each individual project; we strive to create lighting solutions that provide the highest visual impact possible.
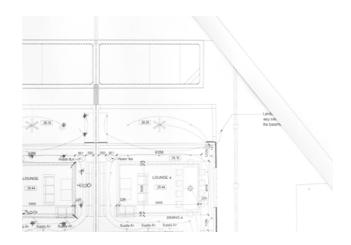

To do this we are always researching and consciously looking for the opportunity to create something unique. We always make sure our luminaires go above and beyond those currently available; both technologically and aesthetically.

The Lighting Design

We work very closely with our clients on their lighting plans, identifying the key concepts that they want to achieve; from the design and aesthetic, to the atmosphere of the space.

Walking our clients through their plans allows us to determine how to optimise both the functionality of a space, as well as the design. By utilising Dialux software, our clients are able to see their ideas come to life right before their eyes.

Each lighting plan is thoroughly revised and refined by our lighting designers.

Environment and Sustainability

From the manufacturing, to the life of each fitting, we are committed to making sure that Faze luminaires have the lowest environmental impact possible.

As a company we constantly make sure that not only the highest quality components are used in our luminaires, but also that our research and design behind each and every product is extensive. This ensures that the end result for all our projects are of the highest calibre, as well as extremely energy efficient, both at the time of installation and for years to come.

Reduced Packaging

Waste from packaging is one of the biggest causes of today's environmental issues, so we have made it a priority to reduce ours by 30%. Through this redesign, we have also re-engineered the manufacturing process; consuming less energy and creating lighter and smaller packages, for less fuel consumption during shipment.

Energy Efficient Lighting

LEDs are the latest in lighting technology, using approximately 80% less electricity than halogen globes. By reducing energy consumption, LEDs therefore help cut greenhouse gas emissions that are harmful to the environment. LEDs also have a reported lifetime of up to 30 years, which saves you the inconvenience of having to regularly purchase and replace globes.

By using LEDs you can therefore generate huge savings on your electricity bill, as well as contribute to building a better environment. What's not to love?

Warehouse Impact

Our completely electric, automated shrink-wrapping machine stretches out plastic by 400%. This is one of the most environmentally friendly ways to wrap pallets and get our lights safely delivered to you without any damage.

We also have fully electric forklifts that produce zero emissions during operation, so there is no need for warehouse ventilation. As our forklifts don't have engines, they eliminate the process of having to dispose of the waste fluids that standard forklifts produce.

Our warehouse is now much safer for our workers and the wider environment.

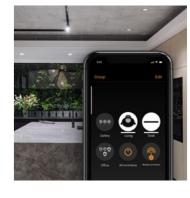

Reducing Solder

Soldering can lead to serious chronic health effects, not to mention negative environmental consequences. Reducing the use of solder wherever possible is just one of the ways we are lowering our environmental footprint. Our LED connection is now completely solder free, this process is actually stronger and more reliable under high heat conditions.

Safer & Smarter

We have designed our fittings to last as long as possible. In addition to this, our focus on customer service ensures a simple process to have any issues resolved in the event your light needs restoring. Because the longer you have them, the longer we are all conserving resources.

As a result of thorough evaluations, we have eliminated the use of harmful chemicals from our products. One example of this, is that we use laser printing on all of our drivers, which therefore eradicates the use of toxic ink.

Bluetooth Integration

Bluetooth technology is another way of reducing your utility bills and improving your quality of life. Saving energy is the most important benefit of installing a Bluetooth integration system. By pre-setting your lights to a specific scene, you can save energy whilst also creating ambience.

Product design and Testing

Lighting is our passion - we don't just think of what is trending at the time, but rather look to the future of the lighting industry and what our clients needs will be going forward.

High Quality Drivers

Our drivers are especially designed to provide the best power source for each light fitting. With Flicker Free drivers and Casambi Bluetooth drivers available, the Faze range provides quality and reliability.

Aluminium Heat sinks

Our heat sinks are made of special aluminium and are uniquely designed for each fitting. Each design ensures that the fittings' heat is dissipated safely and that the maximum heat reduction is provided, to keep the LEDs cool and ensure long lasting light.
High Quality Reflectors and LEDs

Our reflectors and LED chips are made from the best materials available, every reflector and chip is chosen specifically for each fitting, to maximise light emission. Our LED chips are some of the best available within the lighting industry.

High Quality Lenses
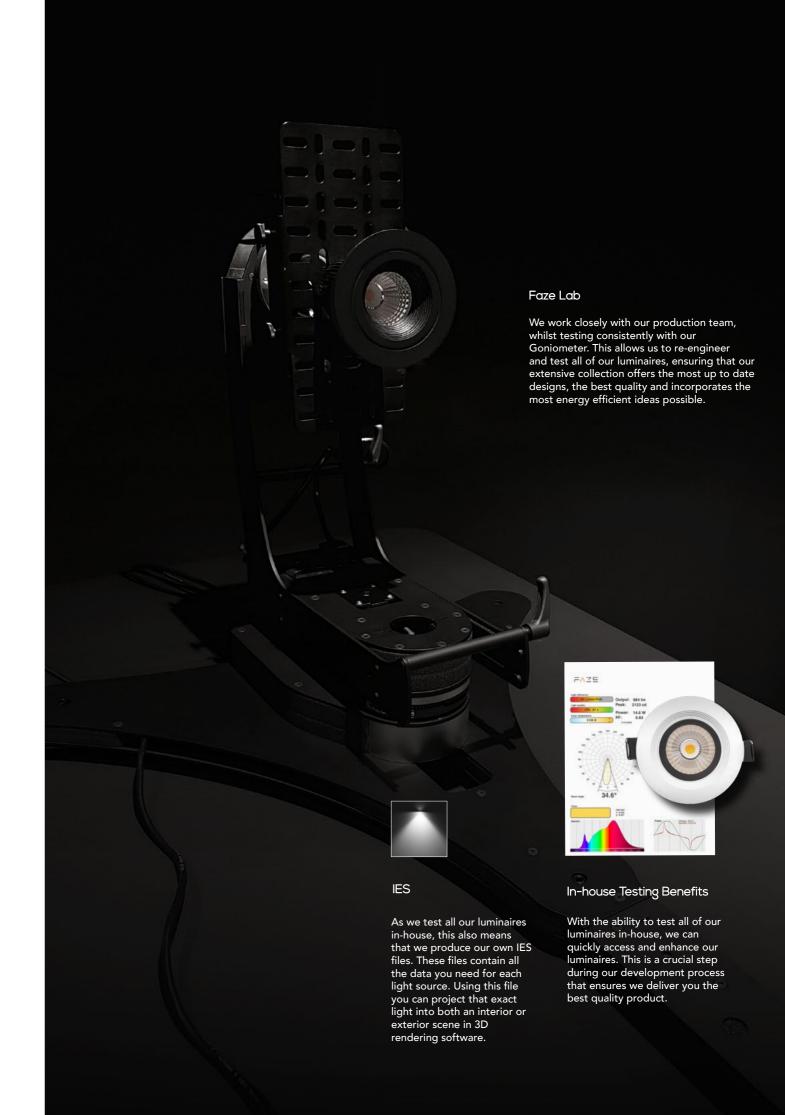

Whether it be a diffuser or standard lens, we put every bit of consideration into the quality. We ensure that each fitting has the best suited lens for it's light output.

Aluminium Fascias
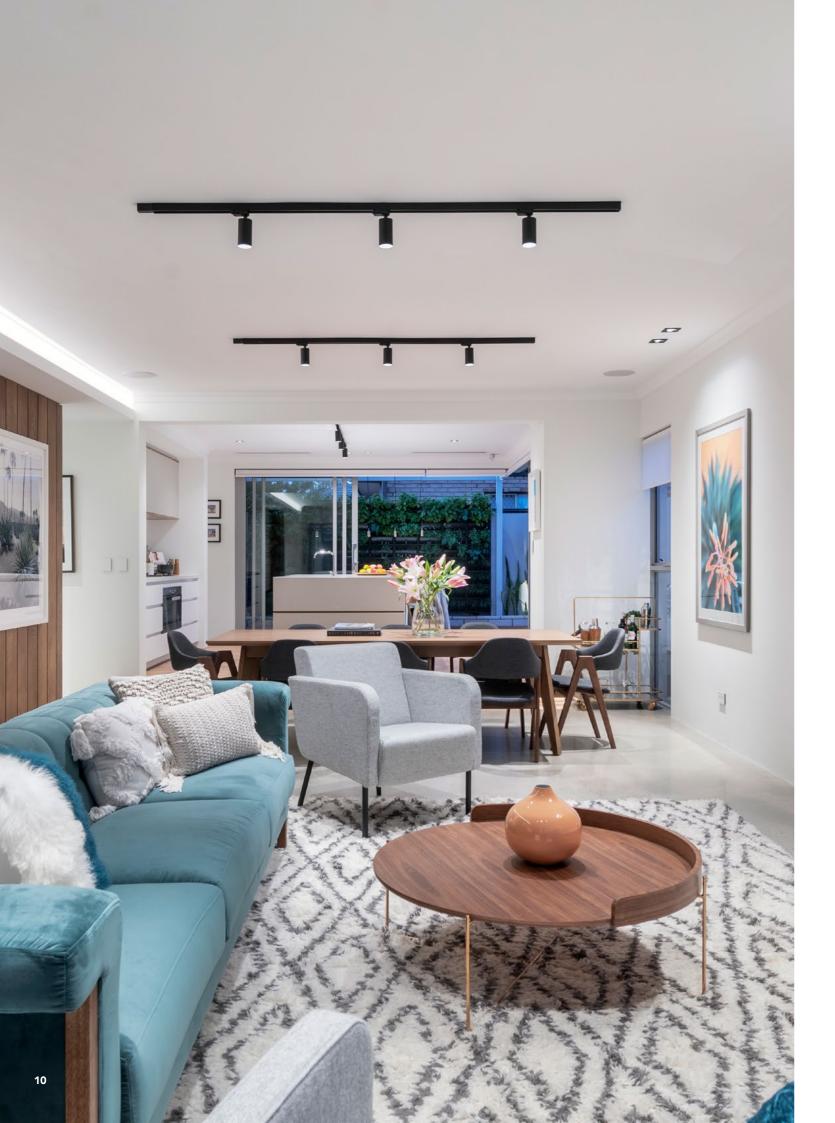

All of our downlights incorporate powder coated aluminium fascias, ensuring durability and longevity.

All our fittings are all made from the best materials available, this includes aluminium bodies, stainless steel components, various polycarbonate parts and superior LED chips.

Faze Vita

Faze Lab

We work closely with our production team, whilst testing consistently with our Goniometer. This allows us to re-engineer and test all of our luminaires, ensuring that our extensive collection offers the most up to date designs, the best quality and incorporates the most energy efficient ideas possible.

IES

As we test all our luminaires in-house, this also means that we produce our own IES files. These files contain all the data you need for each light source. Using this file you can project that exact light into both an interior or exterior scene in 3D rendering software.

In-house Testing Benefits

With the ability to test all of our luminaires in-house, we can quickly access and enhance our luminaires. This is a crucial step during our development process that ensures we deliver you the best quality product.

The Importance of Quality in Lighting

Lighting is a crucial aspect of interior and exterior design, not only does it enhance aesthetic appeal but lighting also creates a safe and comfortable environment for any space. Good lighting can literally make or break any design plan, it is futile to renovate or construct your home with the best architectural features and furnishings if the lighting they are paired with is not first class. There are a few major aspects involved to ensure your lighting is of the highest quality, these are: Colour Rendering Index, Colour Temperature, Colour Stability and Colour Consistency.

CRI

Colour Rendering Index

Colour Rendering Index (CRI) is the accurate measurement of the capability of a light source to exhibit, in high grade, the true colour of various objects. The metric scale of CRI is from 1 - 100, (with 100 being the closest to natural light) therefore the higher the CRI, the better the light source is at rendering colours accurately.
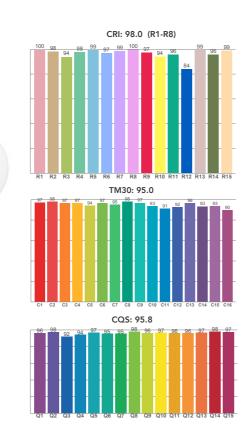

| 80 CRI | 90 CRI | 97+ CRI |

Pictured Above: A depiction of the colour difference between each CRI.
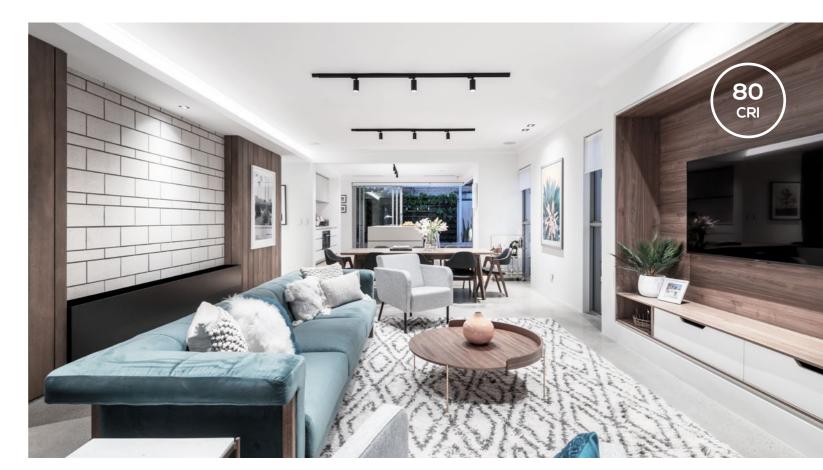

How do we compare?

A high CRI is crucial when designing any lighting plan, from residential to commercial, as it will make sure that all of the architectural features and materials in your space are enhanced exceptionally. The high CRI of all Faze products are perfect examples of this, as they will enhance the details in stone countertops, the rich colouring of hardwood floors and everything in between.

Faze Pro

97+
CRI

CRI: 98.0 (R1-R8)

TM30: 95.0

CQS: 95.8

Pictured Right: Faze Pro Test Results. Recorded from our Faze Lab.

Pictured Far Right: A comparison between low and high CRI ratings.

80
CRI

97+
CRI

CCT

Correlated Colour Temperature
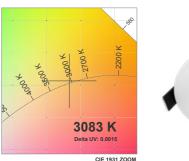

Correlated Colour Temperature (CCT) is a number, expressed in degrees Kelvin, which represents the colour of a light source. It is measured on a scale of 1,000K to 10,000K and indicates the warmth of the light. Light sources with low CCT provide light that appears warm, while light sources with high CCT values provide light that appears cool.

| 2700K | 3000K | 4000K | 6500K |

Pictured Above: Colour Temperature variations, depicted using the Faze Vita IES, colours manually adjusted for depiction.

Pictured Below: Test results for the Faze Pro 13W in 3000K and 4000K, displaying their CCT rating.

Faze Pro

3083 K
Delta UV: 0.0015

CIE 1931 ZOOM

4082 K
Delta UV: 0.0038

CIE 1931 ZOOM

How do we compare?

Unlike CRI, there isn't a right or wrong choice when choosing your CCT, it is more about personal preference.

However, it is worthwhile noting that warm lighting is not always functional and therefore more suitable for rooms where you would like to be calm and have a relaxing glow. Whereas cool lighting is perfect for task lighting and rooms where you would like to enhance concentration.

All of our Faze products are available in a colour temperature of either 3000K or 4000K, as well as 2700K for some fittings, the choice is all yours.

Pictured Right Above: 3000K Lighting

Pictured Right Below: 4000K Lighting

3000K

4000K

Colour Consistency

Colour quality in numbers

Colour consistency refers to the average amount of variation in the quality of colour among a batch of identical lighting products. Put simply, if you were to install 4 downlights of exactly the same kind in a living room, you would expect them to produce exactly the same light, right? However, colour consistency can vary based on the product, the manufacturing and the standards that the manufacturer follows. Colour Consistency is measured in a metric of steps with Step 1 being the best. The lower the Step (or SDCM) the harder it is to perceive the difference in colours. A SDCM of 3 or lower is not visible to the human eye.

Pictured Right: 2 Diagrams explaining the SDCM measurement.

In the upper right diagram is an example of a 3200K target colour range.

In the below right diagram is that elipse closest to the 3200K target with examples of luminaires attempting to match that target value.
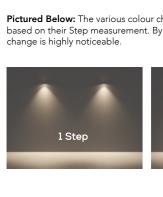

Note: In this example A and B are each 1 Step from the Target Value, but 2 Steps from each other.

C and D are each 2 Steps from the Target Value, but 4 Steps from each other.

How do we compare?

The majority of our Faze downlights have an SDCM rating of 1.5, making them some of the best rated in the lighting industry.

Pictured Below: The various colour changes in lights based on their Step measurement. By Step 4 the colour change is highly noticeable.

CIE 1931 Chromaticity Diagram

Colour Range example for CCT 3100	Blackbody Locus Curve
Range of Flexible Colour	7 step McAdams Elipses

A 7 Step McAdams Elipse, with Steps 1, 2 and 3 Highlighted.

The McAdams Elipse closest to the 3100K colour range
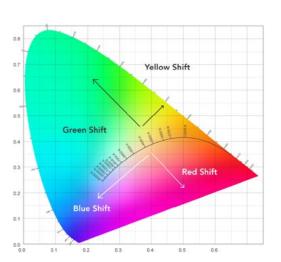

1 Step (SDCM1)	Target Value
2 Step (SDCM2)	Luminaire Chromaticities attempting to match the Target Value
3 Step (SDCM3)	
4 Step to 6 Step (SDCM4 - SDCM6)	
7 Step (SDCM7)	

1 Step | 2 Step | 3 Step | 4 Step

Colour Stability

Lifetime
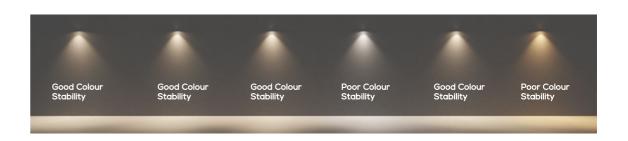

It is possible for the colour output of luminaires to change during their lifetime, even if they are all the same colour temperature. Colour stability is the power to maintain the original colour output over time. Colour shift is the opposite, this is when there is an obvious change in the colour output of a light source, resulting in a change in the temperature and colour rendering properties. Colour shifts can occur due to things like the construction of the product, quality of materials and the application (i.e. where it has been installed and the environmental factors). The primary factor that contributes to LED colour performance is the operating temperature; superior thermal management significantly slows down the degradation of LEDs, which in turn means that the intensity and colour properties remain stable and consistent over time.

Pictured Above: The colour shift directions for LEDs.

Pictured Below: An example of poor colour stability in a series of lights.

Good Colour Stability | Good Colour Stability | Good Colour Stability | Poor Colour Stability | Good Colour Stability | Poor Colour Stability
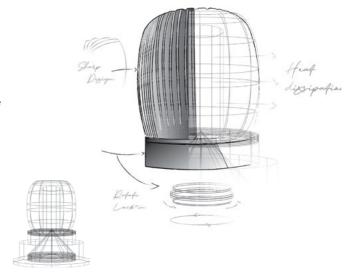

How do we compare?

Our Faze luminaires are all created with high quality LEDs and materials. Every Faze luminaire is manufactured with the upmost care.

Our class leading heat dissipation results in longer lifetimes and colour stability across the board.

Pictured Right: The Faze Pro heat sink has been designed from the core, for the best thermal management possible.

Flicker Free Drivers

We have developed advanced digital control technology to detect dimmer type and phase, providing dynamic impedance to connect dimmer and control LED brightness at the same time.

Unique digital flicker free technology eliminates flicker throughout the entire dimming range and minimises low-frequency output ripple currents.

What is Flicker in Lighting?

Flicker in lighting refers to rapid fluctuations in the brightness of the luminaire. This can occur many times within a second and as a consequence, may not be visible to the human eye. This can cause both neurological and physiological effects.

The Effects of Flicker

LED Flicker is caused by voltage ripple at the output of the AC power supply. Long term exposure to flicker can trigger issues such as headaches, eye strain, visual impairment and even epileptic seizures in some cases. Therefore, our team made the development of a flicker free driver a top priority.

Flicker Free Lighting

Lighting Emitting Flicker

Flicker Free Driver Features

Two stage power factor correction, high frequency driver – which modulate the output frequency, ripple and noise.

Extended lifetime.

Exceeds current flicker and stroboscopic standards.

Increased power factor, ensuring greater efficiency.

Advanced dimmer detection technology.

Bluetooth Integration

As technology advances, so do our luminaires. As a result, we always ensure that you will continue to have the best quality of light.

With the introduction of Casambi Bluetooth into our luminaires, we are enhancing the user experience and taking Faze to the next level.
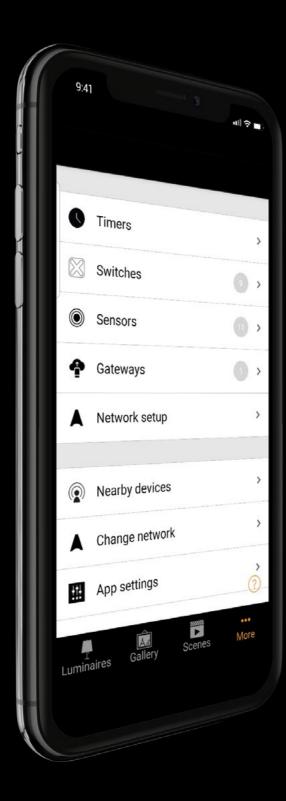

Casambi utilises Bluetooth Low Energy (BLE), the state-of-the-art wireless technology and the only low power wireless technology in all modern devices. With this, Casambi creates a self-organising wireless mesh network, where each module has the intelligence of the system replicated inside it, creating a system with no single points of failure.

With this complete control over your lighting, via your mobile device or remote, Casambi Bluetooth makes lighting control easier and more efficient than ever before.

An Introduction to Casambi

The Casambi app is an all-in-one lighting control system, which allows complete access to lighting manipulation, through Bluetooth on your mobile device or remote. Available to download from the Apple App store and Google Play, it is the simplest solution to control your lighting.

Key Features of Casambi

Scenes

Create lighting to suit a specific event or space.

Colour Change

Change the colour on any RGB or RGBW light fittings, with the ability to select an individual colour from a colour wheel.

Daylight Sensor

When a sensor is installed, Casambi has the ability to detect when sunlight is present and deactivate the artificial light source. This is a great energy saver and helps ensure the longevity of your luminaires.

Gallery

Take a photo of a room or upload a floor plan and mark the positions of the luminaires. The images are then displayed in a gallery with the luminaires and you can simply tap the one you would like to control.

Sunrise and Sunset

The ability to calculate and detect sunrise and sunset via your phones network and GPS location. The app can then adjust your artificial light according to the natural light that is present.

Parameters

Specific data can be read about the light fitting. This data could be LED options, power consumption or driver versions installed.

Calender and Timer

The app can turn your lights on and off based on a set time or date chosen by you.

Animations

The ability to create lighting animations through dimming and colour changing sequences.

Grouping

Group together multiple light fittings and control dimming and switching all at once.

Motion Sensor

When a motion detector is installed, Casambi has the ability to activate or deactivate the lights when movement is detected.

Scalability

The Casambi app is suitable for small or large scale spaces. Whether it's a bedroom or an office, Casambi has a boundless network system.

Elements

Casambi partners have the ability to make unique, company specific features and products within the Casambi ecosystem. The products that can be developed could be controlling blinds, curtains, doors, or any relay equipped technology. This functionality also makes it possible to control luminaires with motors.

The Benefits of Bluetooth

There are a lot of benefits to having Bluetooth as a part of your lighting setup. The Casambi Bluetooth system will help you in many ways, inclusive of saving both time and energy.

Time Saving

You can save a significant amount of time by pre-setting all of your lighting to your specific schedule.

Energy Saving
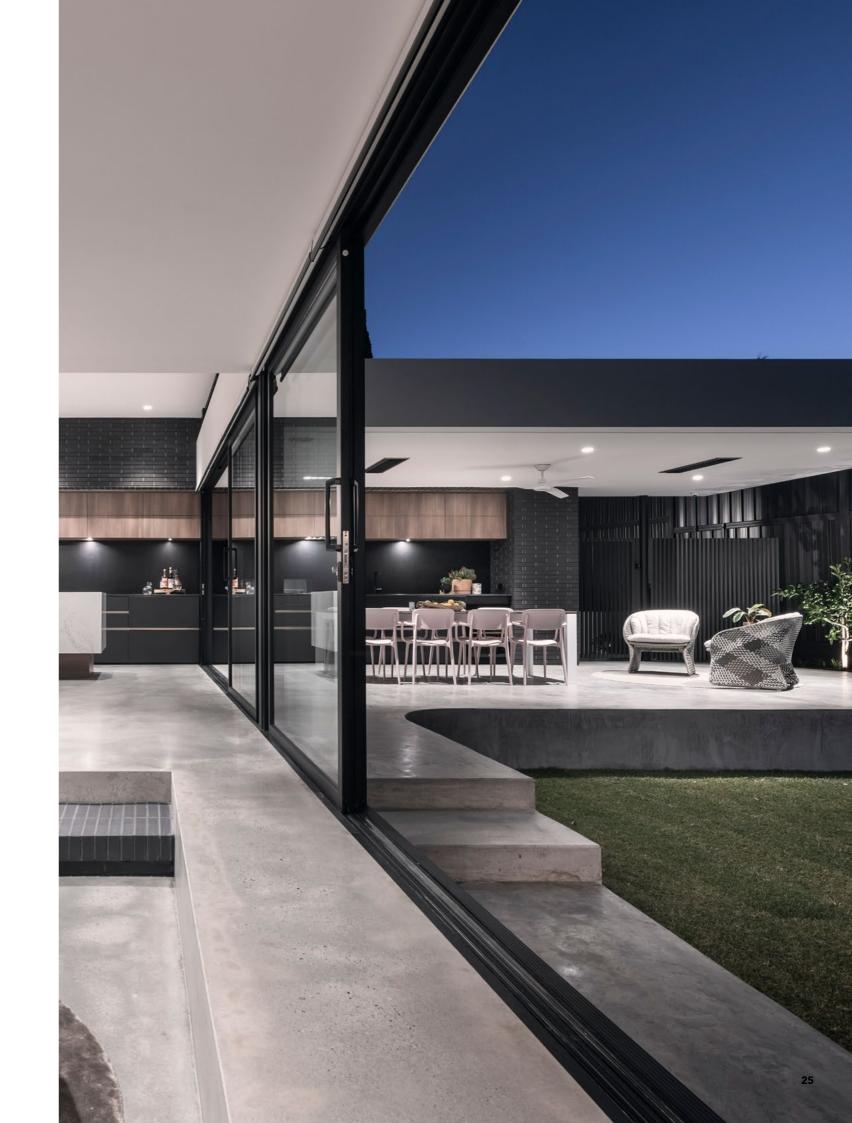

With Casambi's daylight sensors, motion sensors and sunrise/sunset detection, you will save a significant amount of energy in your home without even having to think about it.

Cost Saving

With all the energy saving from automatic timers, you'll reduce the costs of power significantly, as well as the costs of future light replacements from excess use.

A Step Forward In Technology

By incorporating a Casambi Bluetooth network in your home, as technology progresses; so will your day to day life. With Casambi technology moving forward into other Bluetooth devices such as shutters, curtains and doors, eventually the majority of your home will be accessible via your Casambi Bluetooth network as well.
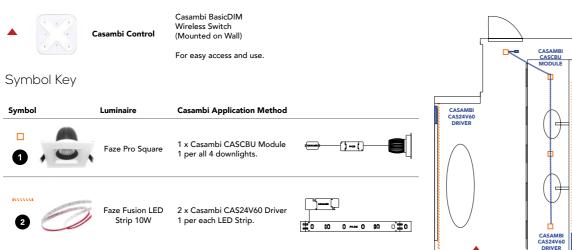

Examples of Bluetooth layouts

When applying Bluetooth to your lighting plan, it is essential that you ensure the Bluetooth layout caters to all of your needs. These are some examples of how Casambi Bluetooth can be applied to enhance the lighting options in your home.

Bathroom Application
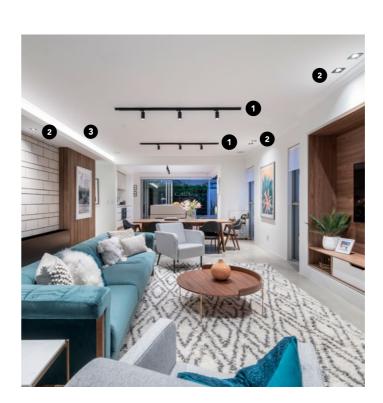

By applying Casambi to this bathroom, you can control the light to suit your needs. In this example we have used separate controls on the LED strip and one control for the 4 downlights. Therefore if you wanted to take a relaxing bath, you could have the perfect ambient lighting by switching the downlights and the LED strip around the mirror off, and the LED strip above the bath dimmed to 30%.

Living and Dining Room Application

In this example the Casambi Bluetooth application has been used to enhance the experience of the living room and dining area. By incorporating the following application method, an activity such as watching TV can be enhanced by individually controlling the lighting. You could have the downlights above the TV off, the track lighting and LED Strip dimmed, and the feature downlights left on. This will create the perfect ambience and can all be done from the comfort of your couch.

3	Faze Fusion LED Strip 10W	1 x Casambi CAS24V60 Driver 1 per each LED Strip.	

Kitchen Application

In this example Casambi has been applied to enhance the light whilst cooking and entertaining, as well as saving power when the kitchen is not in use. Whilst cooking you may decide to have all of the lights on, however when entertaining, choose to turn off the rear LED strip so as not to light unnecessary space. If entertaining in another area, you could dim the downlights to 10%, leaving the counter top featured under the accent light of the Silo pendants.

Product Enhancements

Since our 2020 collection, every Faze luminaire family has had significant changes made, to enhance and improve each product. We are always looking ahead, towards the highest quality and performance for every product.

CRI 90+

95% of our luminaires now have a 90+ CRI
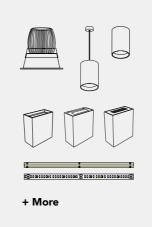

The vast majority of our luminaires now have a CRI rating of 90+. Ensuring they all perform at the highest standard.

Several new additions

We have expanded our entire range, with new additions in every collection, Faze now excels in every category of lighting.

As well as luminaire additions we also have an extensive range of accessories, especially for our Faze LED strip and track collections. These allow for much more creative lighting solutions.

+ More

Enhancements in every category

As well as completely new products we have also revamped old Faze favourites and made them better than ever before. With enhancements such as quality increases in the materials used, updated LED chips and improved accessories, these allow our luminaires to hit the next level in performance.

4000K Additions

Several luminaire collections are now available in a CCT of 4000K. This includes the Cubix, Cubix Square and Split.
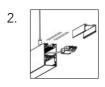

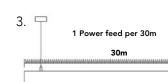

Line Opal Series Enhancements

1. The introduction of corner pieces, ensuring various seamless light configurations.

2. Improved snap-lock connection design, for increased durability.

3. Can now be installed up to 30m with 1 power feed.

Product Additions

1 Pro Adjustable

An adjustable addition to the Pro collection, this downlight has tilting abilities up to 40° and much more control over the beam angle produced.

Page 51

2 Edge 135

A larger, more powerful version of the original Edge design. The Edge 135 provides an ideal option for expansive commercial projects.

Page 59

3 Edge Wall Washer

Another addition to the Edge collection, this angled downlight has been designed specifically for wall washing.

Page 59

4 Lite 125

A larger and more powerful model in the Lite series. The Lite 125 is another great choice for large scale commercial projects.

Page 67

5 Core Series

The Core is powerful and superior in design. With fixed, adjustable, track and suspension options, the Core series is the most versatile addition to our lighting collection.

Symbol Key

Use the following guide to understand each symbol within this catalogue.

IC RATING

IC-4

A measurement used to determine if a recessed downlight is suitable to come into contact with your building insulation or not. IC-4 means that the light can be covered by insulation.

CLASS 1

A luminaire in which protection against electric shock does not rely on basic insulation only, but which includes an additional safety precaution in such a way that means are provided for the connection of accessible conductive parts to the protective (earthing) conductor of the fixed wiring of the installation in such a way that accessible conductive parts cannot become live in the event of a failure of the basic insulation.

CLASS 2

A luminaire in which protection against electric shock does not rely on basic insulation only, but in which additional safety precautions such as double insulation or reinforced insulation are provided, there being no provision for protective earthing or reliance upon installation conditions.

CLASS 3

A luminaire in which protection against electric shock relies on supply at safety extra-low voltage (SELV) and in which voltages higher than those of SELV are not generated.

REGULATORY COMPLIANCE MARK (RCM)

This is a compliance requirement in Australia and New Zealand, it shows that a product is safe to supply to the Australian market. This marking indicates compliance with electrical safety, EMC, EME & telecommunications requirements, as applicable to each product.

INGRESS PROTECTION (IP) RATING

IP65

This classifies the degrees of protection a fixture provides against the intrusion of foreign bodies like dust or water. The first digit represents the level of protection against solids and the second is the level of protection against liquids.

COLOUR RENDERING INDEX (CRI)

CRI 90+

A scale from 1 to 100, indicating how effective the lamp is at rendering colour. The higher the CRI, the better the colour rendering ability.

DIMMABLE

The product is dimmable.

BEAM ANGLE

36°

The angle at which the light is distributed or emitted.

IMPACT PROTECTION (IK RATING)

IK10

IK Rating or 'Impact Protection' indicates the level of resistance an electrical enclosure provides against mechanical impact. It is a 1 to 10 system with a higher number indicating better ability to maintain safety at higher energy impacts.

LIFETIME

>55K

Defined as the time it takes (in hours) until the light output of the LED reaches 70% of the initial output. (55K - 55,000 hours)

ADJUSTABLE TILT

±25

The maximum angle that the head of the product can be adjusted.

ADJUSTABLE ROTATION

360°

The distance around which the product can rotate.

WARRANTY

7

The number inside represents how many years the warranty is valid for.

FLICKER FREE

The driver is flicker free. Unique digital flicker-free technology eliminates flicker throughout the entire dimming range and minimizes low-frequency output ripple currents.

UNIFIED GLARE RATING (UGR)

UGR <19

UGR is a numerical calculation of how much glare is produced by a luminaire once in operation.

*The UGR calculation takes the parameters of the installation into account, it allows for various room cavity reflectance values and different room sizes.

For the full UGR table please contact our lighting consultants via email sales@radiantlighting.com.au

LED

LED

The light source of this product is LED (light emitting diode).

STANDARD DEVIATION COLOUR MATCHING (SDCM)

SDCM ≤2

SDCM is a system of colour measurement. It measures how much colour variation is possible around these axis, before the human eye detects a colour change. An SDCM of 1 step means that there is no colour difference between LED chips, 2-3 SDCM means that there is hardly any visible colour difference while 4 or more SDCM is easily noticeable. The lower the number of SDCM, the smaller the color shift.

24 VOLT DC

24V DC

24 Volt Direct Current power supply.

OUTDOORS

Suitable for outdoor application.

BLUETOOTH COMPATIBLE

Compatible with Casambi Bluetooth devices.

Downlights

Downlights are the essential foundation of any lighting plan. With the primary purpose to provide functional and ambient light throughout any space, the downlight is the core element of lighting.

Downlights Quick Selection Guide

Adjustable Downlights

Downlight	Wattage	Lumens	CRI	Beam	Lifetime	Concrete Suitable	Dimensions	IP	Features			Warranty
Edge Mini Page 59	11W	975 lm (3000K) 995 lm (4000K)	92+	15° 24° 36° 60°	>55,000hrs L80B10	N/A	Ø 86 mm **(W)** 105 mm **(H)** Ø 76 mm **cut-out**	44	Minimal trim design and deep set lamp position, for visual comfort and glare control.	Adjustable tilt up to 25°, for dynamic and flexible lighting.	Provides intense illumination with very little energy, ideal for areas with lower ceilings.	7 Years
Edge 100 Page 59	13W	1200 lm (3000K) 1320 lm (4000K)	92+	15° 24° 36° 60°	>55,000hrs L80B10	N/A	Ø100mm **(W)** 115mm **(H)** Ø 92 mm **cut-out**	44	Minimal trim design and deep set lamp position, for visual comfort and glare control.	Adjustable tilt up to 25°, for dynamic and flexible lighting.	Utilises advanced LED engines, achieving unmatched illumination.	7 Years
Edge Wall Washer Page 59	13W	1150 lm (3000K) 1210 lm (4000K)	92+	15° 24° 36° 60°	>55,000hrs L80B10	N/A	Ø100mm **(W)** 115mm **(H)** Ø 92 mm **cut-out**	44	Designed with a 45° slant to provide the best possible light for a wall washing application.	Adjustable tilt up to 25°, for dynamic and flexible lighting.	Utilises advanced LED engines, achieving unmatched illumination.	7 Years
Edge 110 Page 59	13W	1200 lm (3000K) 1320 lm (4000K)	92+	15° 24° 36° 60°	>55,000hrs L80B10	**Suitable for concrete install;** concrete canister ordered separately.	Ø110mm **(W)** 115mm **(H)** Ø 92 mm **cut-out**	44	Minimal trim design and deep set lamp position, for visual comfort and glare control.	Adjustable tilt up to 25°, for dynamic and flexible lighting.	Utilises advanced LED engines, achieving unmatched illumination.	7 Years
Edge 135 Page 59	25W	2255 lm (3000K) 2340 lm (4000K)	92+	24° 36 ° 60°	>55,000hrs L80B10	N/A	Ø 135mm **(W)** 160mm **(H)** Ø 125mm **cut-out**	44	Minimal trim design and deep set lamp position, for visual comfort and glare control.	Adjustable tilt up to 25°, for dynamic and flexible lighting.	Essentially a larger version of the Edge 110, ideal for commercial projects.	7 Years
Pro Adjustable Page 51	11W	965 lm (3000K) 1014 lm (4000K)	97+	45°	>55,000hrs L80B10	**Suitable for concrete install;** concrete canister ordered separately.	Ø 106mm **(W)** 65mm **(H)** Ø 92 mm **cut-out**	20	Black baffle design, reducing glare for optimum visual comfort.	Adjustable up to 30° and rotatable up to 350°.	Flicker free driver available.	7 Years

All of our downlights also include the following features

Available in a black or white powder coated finish. * Excluding Starlight LED, which is only available in anodised aluminium or white. * The Faze Disc is also available in silver.

Available in 3000K or 4000K.

Compatible with Casambi Bluetooth devices.

Dimmable.

Pro
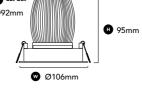

The new generation Faze Pro series has been specifically designed to enhance.

Utilising superior LED technology with the highest CRI, these recessed downlights are guaranteed to bring any space to life.

Designed to Last

The Pro series has been designed with quality and performance in mind.

Aluminium Heat Sink

Specially designed for maximum heat dissipation.

Aluminium Mounting

Providing a durable mounting system.

Approved for Concrete Use

With class leading heat dissipation, the Pro Square and Round are both approved for concrete installation.

Seamless Mount to Ceiling

With minimal fascia extrusion, the Pro series all feature a seamless design when recessed into the ceiling.

Maximum Design Opportunity

The Pro series is available in black or white, as well as various sizes, beam angles and silhouettes. This allows for maximum design opportunities.

CRI 97+

The Pro series is one of the best performing downlights available, especially when it comes to colour rendering. With a CRI of 97+ the Pro series can enhance any room with vibrant light.

Precision Reflector with Clear Lens

For high quality light distribution and performance.

Specially Designed Heat Sink

Designed from the inside out, for class leading heat dissipation.

Black Baffle

A unique black baffle design that significantly reduces glare, for optimum visual comfort.

IP44 Suitable for wet areas and outdoors   Casambi Bluetooth Compatible

Featured Fitting

Our Pro Square downlight was the perfect choice for this luxurious penthouse apartment. It's high CRI ensured that all of the architectural features were enhanced exceptionally.

Pro Square

IP 44 Rating

IP44

The Pro series has an IP rating of 44, allowing them to be used both indoors and outdoors.

Design Versatility

The Pro can be used in a variety of environments and designs. Consider the Pro as an alternative to some linear or surface mounted lighting options.

Featured Fitting

Pro Round

Clean lines and minimalism. Just a few of the stunning details in this private home that have been brought to life by our Pro Round downlights.
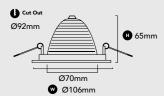

New Innovative Design

The Pro series now includes the Pro Adjustable. This fitting has been designed to increase the amount of light manipulation in one downlight.

The Pro Adjustable has a rotation of 350° and the ability to tilt up to 40°.

Cut Out
Ø92mm

H 65mm

Ø70mm

W Ø106mm
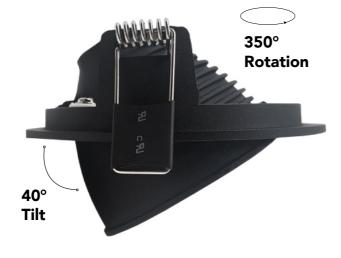

Adjustable up to 40°, Rotatable up to 350°

With a tilting ability of up to 40° and rotation of up to 350°, the Pro Adjustable allows complete control of the light emission and direction.

The versatility of this downlight indicates that it would be ideal in a project such as an art gallery, where light direction is required to change on a regular basis and many different lighting options are needed at any one time.

350° Rotation

40° Tilt

Non-Obstructed Light

With the Pro Adjustable's unique design, the light emission is not obstructed by the physical properties of the fitting. This means you always have the maximum light distribution from the luminaire with a clean, distinct light.

Featured Fitting

The Pro Adjustable has been designed for versatility. In this project it has been used for task lighting over the bathroom vanity.

Pro Adjustable
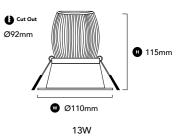

Edge

The Faze Edge series incorporates a minimal trim design, with advanced LED engines, to achieve intense illumination with a high lumen per watt efficacy.

Luna Starlight Pre-Connected Driver

The Luna Starlight features a pre-connected driver which fits neatly through the fittings cut-out.

Luna Starlight

The Luna Starlight will seamlessly showcase artwork, provide functional light over bathroom mirrors, or create a striking feature in bulkheads.

Starlight LED

The Starlight LED is perfect for illuminating window seats, artwork and feature walls. It's miniscule proportions allow it to fit into even the tiniest space.

IP 65

Our Luna Starlight is IP 65 rated and suitable for both wet areas and outdoors.

High Illumination

The highest illumination available in our Starlight collection, with a maximum output of 500 lumens.

IP 65

Our Starlight LED is rated IP 65 and is suitable for wet areas and outdoors.

High Efficacy
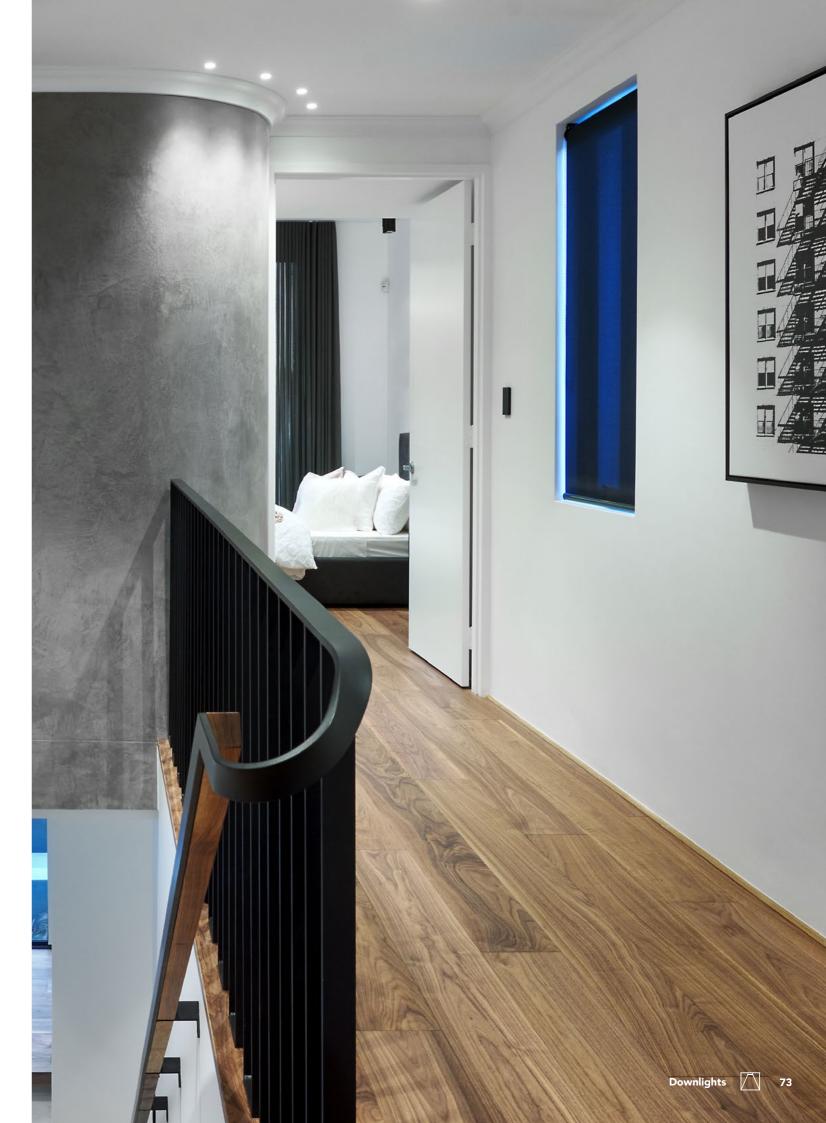

Powerful illumination with low energy consumption.

W 317mm
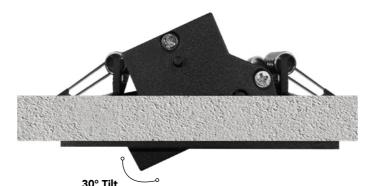

LED	20W
Lumens	1320 lm (3000K) 1400 lm (4000K)

30° Adjustable Lighting

With a 30° tilt ability, the Dash is the perfect fitting for accent lighting and wall washing.

30° Tilt

Osram LEDs providing high colour rendering and performance

Featuring the latest in Osram LED technology, the Dash provides a CRI above 90 and a maximum output of 1400 lumens.

CRI 90+

Osram LED

The combination of Osram LEDs and a high quality reflector, give the Dash an optimum lumen output.
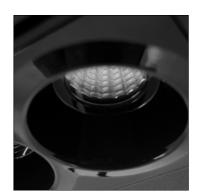

Specially Designed Heat Sink

Designed specifically to suit the Dash's linear orientation, this heat sink provides class leading heat dissipation.
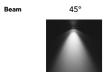

Refined Linear Design

The Dash features a modern, slim and refined downlight design, suitable for projects where a linear style, rather than the typical round downlight, is required.

Deep Black Baffle and Reflector

A unique black baffle design that significantly reduces glare for optimum visual comfort.

Beam 45°

DIMMABLE

UGR <5

Manufactured with quality

From the smallest detail to the highest quality LEDs available; the Dash is built with quality and durability in mind.

Osram LEDs

LEDs made for performance. These Osram LEDs are capable of an output of up to 1400 lumens and a lifetime greater than 54,000 hours.

Aluminium Heat Sink

A high quality aluminium heat sink, for maximum heat dissipation.

High Quality Reflectors

The Dash has unique individual reflectors, each designed to assist in emitting the best quality of light.

Polycarbonate Black Baffles

The individual black baffles significantly reduce glare. With a UGR of less than 5, the Dash has the lowest UGR in the Faze collection.

Aluminium Fascia and Mounting Clips

Constructed using aluminium, then powder coated for colour; the Dash fascias are built to last.

Designed with Care

The Dash has been designed with no detail overlooked. From the inside-out, this series delivers both style and functionality.

LED Strip

With the ability to be flexed, recessed, angled or surface mounted, our LED strip collection allows for extensive design opportunities.

LED Strip

The Faze LED strip collection includes PCB and COB options, which are ideal for use along ceilings, walls, cabinetry, stairways and much more.

An Enhanced and Extended Collection

We have completely reviewed and enhanced our LED strip collection. With new additions such as the Fusion linear range, the Faze LED strip collection supports all of your design needs.

The Faze LED Strip Experience
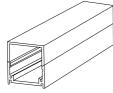

As we have improved our collection, we have also improved the experience in which you select your LED strip and profile. This catalogue includes a user friendly selection guide that has all of your LED strip and profile in one place. We have also included design ideas and inspiration, to help ensure you select the correct LED strip for your next project.
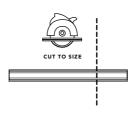

LED Strip Composition Guide

There are many factors to consider when it comes to selecting and composing LED strip. Refer to the following guide to help you ensure your LED strip configuration is selected correctly.

Step 1.

Determine the length of the space.

Step 2.

Determine which LED strip profile you require.

Step 3.

Your required length is cut to size.

Step 4.

Determine which end caps you will require.

Step 5.

Select mounting clips, if required.

Step 6.

Determine if you will need joining clips and how many you will require.

Selection One - LED Strip Profile

Steps	Factors to Consider
1. Determine the length of the space.	The total width and length of the space required for the profile. Whether the connectors will need to be included in the space.
2. Determine which LED strip profile you require.	If you require a recessed, straight or angled profile for that particular space. Whether you require a darker or lighter version of the profile. If you require light in one direction or in several. (Dependant on size selection)
3. Your required length is cut to size.	The total length of the LED strip and connectors within the profile (Please allow 15mm for the solder connection). Please allow 4mm for inclusion of the End Caps. Ensure your length is correct.

Selection Two - LED Strip Profile Accessories

Steps	Factors to Consider
4. Determine which end caps you will require.	Whether you require a closed end cap or an end cap which allows the wiring to run through.
5. Select mounting clips, if required.	The total length of the LED strip profile and how many mounting clips will be required to safely mount that length. We recommend 2 mounting clips per meter.
6. Determine if you will need joining clips and how many you will require.	The total length you require of your LED strip profile, compared to the total length the LED strip profile is available in (2m).

LED Strip Profile Selection

Accessory	Dimensions	Finishes		Standard Length

Step 8.

Determine which LED strip you require.

Step 9.

Your required length is cut to size.

CUT TO SIZE

TOTAL LENGTH

Step 10.

Supply the amount of LED strip connectors you will require.

Step 11.

Determine the driver you require.

240V DRIVER

Selection Three - LED Strip

Steps		Factors to Consider
7.	Determine the length of LED strip you will require.	Whether the LED strip connectors will need to be included within the space/LED strip profile.
8.	Determine which LED strip you require.	How much power and light output you will require for your space. The total length in which the LED strip can run and how much you will require in comparison.
9.	Your required length is cut to size.	Ensure your length is correct.
10.	Decide on the amount of LED strip connectors you will require.	Total length of LED strip you are using and how many connectors you will need.

Selection Four - Driver

Steps	Factors to Consider
11. The connectors you require will be supplied.	There is one connector per join. All end connections are soldered and ready for on-site installation.
12. Determine the driver you require.	The wattage you will require. Whether you require Bluetooth compatability.

Sample Configuration

Below is a sample configuration for a 3.2m profile length, using Fusion LED strip 10W, Fusion S30 profile and a straight power feed.

Total Length (Including profile, end cap and O end cap) : 3200mm

Total LED strip length : 3150mm   **Total LED strip length with solder connection :** 3175mm

Straight Power Feed

	Component	Dimensions	Component Description
1.	Mounting Clip	**2 x** (width 16mm x height 4mm x length 27mm)	Designed for a seamless mounting of the profile to any surface.
2.	Joining Clip	**1 x** (width 27mm x height 4mm x length 50mm)	Designed for seamless joining of profile lengths.
3.	End Cap	**1 x** (width 30mm x height 19mm x length 2mm)	A standard End Cap for closing off the profile.
4.	O End Cap	**1 x** (width 30mm x height 19mm x length 4mm)	The O end cap is designed with a rubber O seal, for a straight connection feed to safely run out of the profile.
5.	Fusion S30 Profile	**2 x** (width 30mm x height 19 mm x length 1598mm)	Extruded aluminium designed to house the LED strip.
6.	10W Fusion LED Strip	**1 x** (width 10mm x height 2mm x length 3150mm)	High quality PCB LED strip.
7.	Solder Connection	**1 x** (width 10mm x height 2mm x length 15mm)	A durable connection, soldered locally and ready for on-site installation.
8.	Opal Diffuser	**2 x** (width 30mm x height 4 mm x length 1598mm)	Diffused material designed to reduce glare and conceal LED strip.

Indoor and Outdoor Application

The Faze LED strip collection includes options for indoor and outdoor applications, with IP ratings up to 68, which are durable in any weather conditions.

Use the following guides to help determine which Faze LED strip is best suited for your next project.

Application Ideas

Application Example	Application Method	Reason for this application
	Bedroom lighting	Along the back of your bedhead is a great way of utilising our LED strip, not only will a warm 3000K light create ambience, but it will also double as a great reading light.
	Bathroom lighting	LED strip has been used here as a backlight for the mirror, as it is functional and also creates great ambience in the bathroom.
	Kitchen lighting	LED strip has been used here as task lighting, to assist with focus and vision whilst cooking. It also assists in illuminating the entire kitchen and creating ambience.
	Staircase lighting	Staircases make a great base for LED strip lighting. Applied under each individual step, LED strip is both functional and stylish.
	Exterior lighting	LED strip is a durable and reliable solution for exterior lighting. By illuminating features such as steps, LED strip creates a bold and vibrant look, highlighting the key features of the architecture.

A New Era of LED Strip

We are always looking to expand and develop our collections. This is why our Faze LED strip now includes more flexible and seamless lighting options.

Nero Profile Addition

With the addition of our nero profiles and diffusers, our LED strip accomodates new aspects of seamless light. Specifically when a darker design is required to complement a space.

Suitable for darker surfaces and finishes

The Fusion Nero has been designed to fit seamlessly in spaces that feature darker finishes and surfaces such as black brick, bookcases and bars.

Subtle Light

The Fusion Nero features a black diffuser, providing a more subtle light with reduced glare.

Mix and Match

The Fusion Nero gives you the opportunity to mix and match the black fittings in our collection, providing consistency in your design.
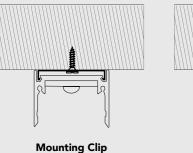

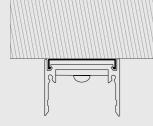

A Seamless Lighting Solution

Our latest Fusion S30/20 and H30/20 profiles feature a hidden-clip mounting system. This allows for a seamless mount between the Fusion profiles and their surfaces.

The joining clips and mounting clips are hidden within the profile body.

This clip system allows for a seamless lighting solution.

Mounting Clip

Joining Clip

Seamless Surface Mounting

With a seamless mounting clip, the Fusion LED strip profile range mounts to the surface with no visible detail, as it sits within the profile itself.

Seamless Joining

The Fusion LED strip profile connects seamlessly with a joining clip designed with the same recessed feature as the surface mounting clip. This clip ensures the application to the surface is seamless as well as the join itself between profile lengths.

Local Customisation

Our LED strip is customised here in Australia. Cut, connected and assembled in our warehouse, we ensure that your LED strip is ready to go on-site.
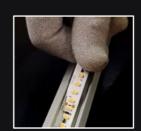

Uniquely catered to your needs.

All connections are done locally.
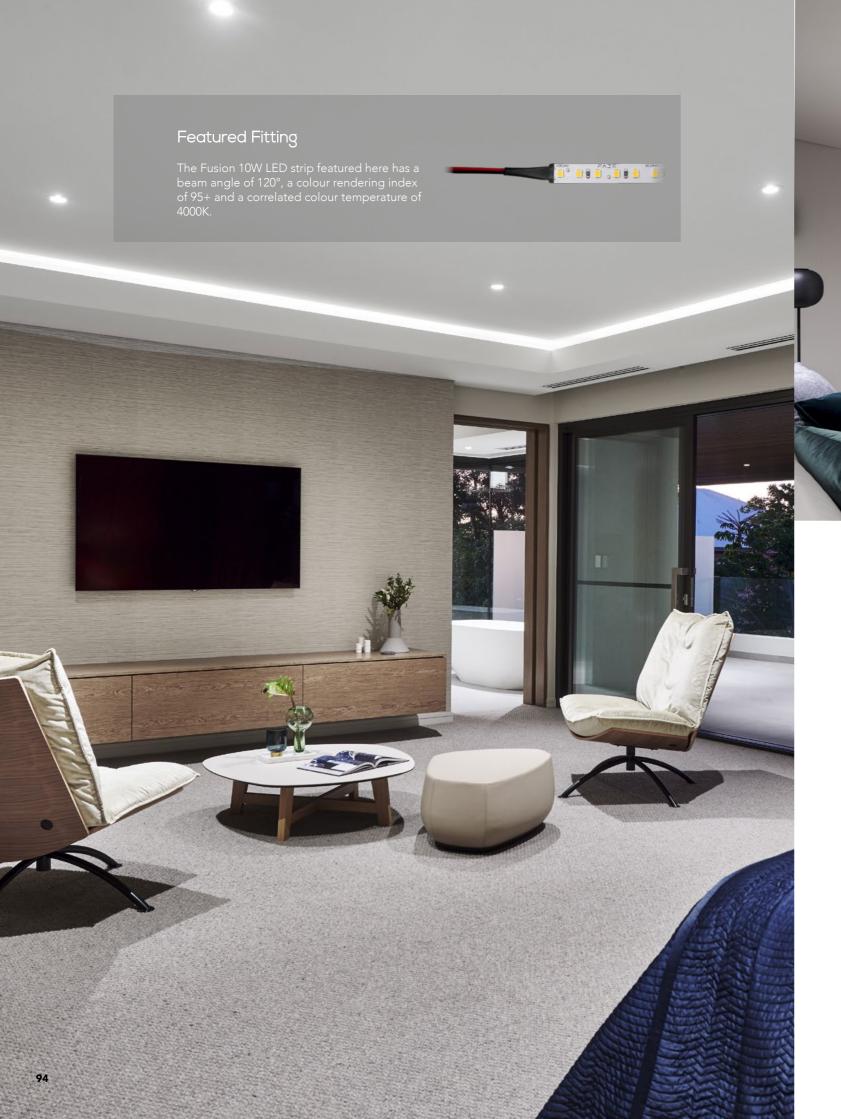

Secure and durable connections.

Preassembled solutions.

Seamless Light

The introduction of our Fusion LED COB 480 brings another seamless lighting option to the Faze LED strip collection.

CRI 95+

With a colour rendering index of 95+, the Faze Fusion LED PCB 120 strip excels in its class.

Featured Fitting

The Fusion 10W LED strip featured here has a beam angle of 120°, a colour rendering index of 95+ and a correlated colour temperature of 4000K.

Featured Project

This home utilises our Faze LED strip throughout, which is a great example of how versatile our LED strip is.
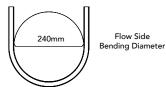

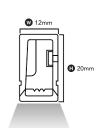

Flow

Bringing LED strip to the next level, Faze Flow is an advanced silicone lighting strip, with more flex and longevity than ever before.

Flow Top

The Faze Flow Top is perfect for designs that require a straight application or a vertical bend. With the ability to bend up to 240mm, the Faze Flow Top is the perfect flexible solution for any project.

Flow Side

The Faze Flow Side is perfect for designs that require a horizontal bend, either left or right. With a bending diameter of 240mm, the Faze Flow Side is an ideal flexible solution, no matter what space.

Customisation

Both the Flow Top and Flow Side are fully customisable. With various end caps, connection options and cutting increments of 50mm; the Flow series is a versatile solution for your LED strip needs.

Locally assembled.

50mm Cutting Increments.

Long Lasting Light

The Faze Flow has an SDCM rating of 2. Most LED strip will discolour and experience colour shift usually within a 3-5 year period. The Faze Flow however is made with a high quality silicone material, which has a life expectancy of 5+ years or more before it starts to colour shift.

*Refer to page 14 - 17 for more details on SDCM ratings.

IP 67

With such a high IP rating the Faze Flow can be used outdoors and can handle any heavy rainfall or water distribution, without getting damaged.

Flexible

One of the best features of the Faze Flow is its ability to be manipulated and flexed. This allows for all new design opportunities, especially on curved and angled surfaces.

High Quality Materials

The Faze Flow is constructed from the best materials available, this includes high grade silicone from the USA. This makes it both UV and chemical resistant.

Simple Connections

Designed for simplicity, Faze Flow connections are easy to install and can be used to create seamless designs. These connectors can also be easily removed when making adjustments, which therefore reduces fabrication time.

Durable

With IP67 polycarbonate connectors, the Faze Flow is durable in any conditions.

Beam   120°

Cut to Size

Available in Top and Side Configurations

Available in Top and Side configurations and either 5W or 10W options, the Flow Plus series has variants to suit any space.

Faze Flow Plus Top configuration

Faze Flow Plus Side configuration

IP 68

With an IP rating of 68, the Flow Plus is waterproof. This means the Flow Plus series can handle any heavy rainfall or water distribution without getting damaged.

We highly recommend the Flow Plus for outdoor use.
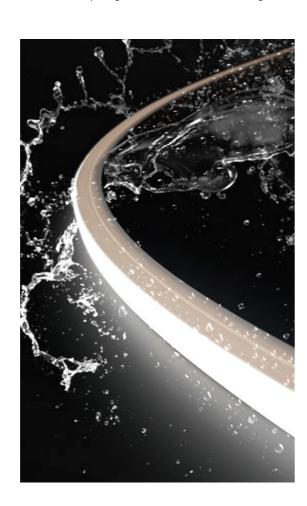

Extensive Colour Longevity

The Faze Flow Plus has an SDCM rating of 2, giving it the lowest level of colour shift available in LED strip lighting.

Most LED strip will yellow over time and experience colour shift, this is usually within a 3-5 year period. The Faze Flow Plus however is UV resistant and made with a high quality polyurethane material; which has a life expectancy of 5+ years or more before it starts to colour shift.

UV RESISTANT

SDCM ≤2

Flexible and Seamless

The Flow Plus series is seamless in all directions. With a solid singular polyurethane body, it is also strong and flexible in function.

High Quality Materials

The Flow Plus is constructed from the best materials available, this includes a body crafted from polyurethane. This makes it both UV and chemical resistant.

Various Connections

Available in 3 different connections, the Flow Plus series allows you to connect your LED strip in any space.
Durable

The Flow Plus has pre-manufactured connections, ensuring a strong and durable connection. This durability ensures long lasting and reliable light.

Surface Mounted
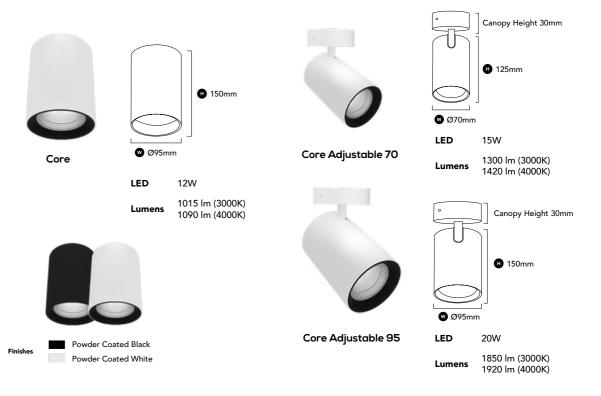

Surface mounted fittings have been a key piece of lighting design for decades. Their immense design value lies in their flexibility, since they can be installed in almost any space without dramatically altering the ceiling or wall.

Core
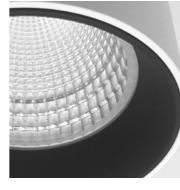

The Core simultaneously creates a stylish feature whilst also providing sufficient task lighting. This makes it ideal for areas with limited ceiling space.

Core

Quick Connection System

The Core features a unique quick connection system, which has been designed for durability and easy installation.

Refined and Developed

The Core has been designed as a more simplistic fitting. With a higher lumen output, enhanced connection system and superior materials; the Core is a signifcant advancement in our surface mounted collection.

Hidden mounting plate/screws for a clean design.

Reduced size, less bulky.

Reduced baffle, higher lumen output.

Versatile

The Core is also available as a suspended and track mounted fitting.

Core Track Page 187

Core Adjustable

Built in Driver

With built in, phase cut dimming, the Core Adjustable has the added benefit of simple installation.

The circular driver is built in to reduce installation time

90° Tilt, 350° Rotation

Rotatable, flexible and dimmable; the Core Adjustable is the perfect light to meet all of your needs. Whether it be accent, task or ambient lighting, it is ideal as a bedside reading light, for highlighting artwork, or simply creating ambience.

90° Tilt

350° Rotation
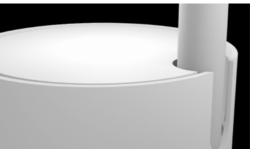

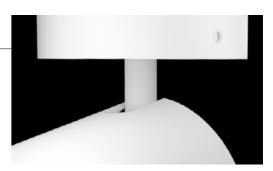

Slimline Canopy

Designed with a minimalistic approach, this canopy suits any modern space with its clean and simple lines.

Unique Adjustable/Rotating Canopy

A unique canopy and hinge design that allows the Core Adjustable to be tilted up to 90° and rotated up to 350°.

Featured Fitting

In this project, the Core has been used as a decorative alternative to downlights over the kitchen island. With the ability to be dimmed, it is not only perfect for task lighting but can also be adjusted to suit your needs.

Core

Split

Highly adaptable, the Faze Split is the perfect design solution. Paired together or used individually, the Split has a modern design aesthetic that fits seamlessly into any interior space.

Split

H 200mm

W Ø65mm

LED	12W

Adjustable and Rotatable

The Split achieves both accent and task lighting due to its innovative rotating components.

Tilt
of up to 60°

Rotation
of up to 350°

Modern and Versatile Design

The Split was designed to be as versatile as possible, whilst still retaining a stylish aesthetic.

Discreet Lock-In Mount
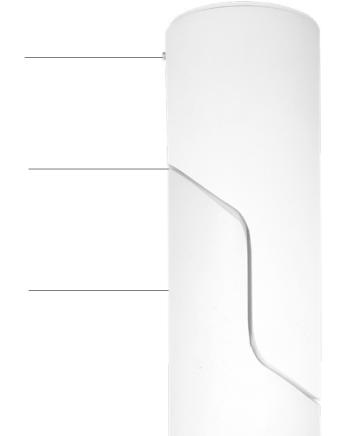

The lock-in screws on the Split are discreet, complementing its minimalistic design.

Geometric Lines

The hinge design on the Split uses a geometric outline to suit any space it is used in.

Slim Design with Powder Coated Finish

A slim profile design and a powder coated finish once again assists the Split in retaining its modern appeal.

Cutting Edge Design

The Split has been designed with a slim, sharp profile to suit any modern living space.

High Lumen Output (per watt)

As the Split is manufactured with the highest quality components, the light emission reflects this; with a lumen output per watt of 89, that is exceptionally high for its class.

Built in Phase-cut Dimming

Featuring a built in dimmer, the Split allows for an easy and seamless installation.

Featured Fitting

The Line Opal can be a great statement piece over a benchtop, desk or counter. In this project 3 of the 1200mm lengths have been suspended over the kitchen bench.

Line Opal

Linear Modules

Use the below guide of preconfigured lengths for some of the possible installations of our Line Opal series.

Linear Module Key

Colour	Line Opal Length
	600mm
	1200mm
	1800mm
	2400mm

Please note

The Line Opal Surface Mount will have a 3mm detail from the ceiling once installed.

One aluminium joiner is required per join.

Maximum Single Power Feed Length

The Line Opal can run up to 30m from 1 power feed.

Total Length

				Total Length

Line Opal Recessed

Low Profile Design

The Line Opal Recessed features a low-profile design, with a total depth of only 65mm.

65mm

1mm depth from the ceiling

Ceiling

Opal Diffuser

Incorporated into the Line Opal collection, the Recessed option also uses an opal diffuser.
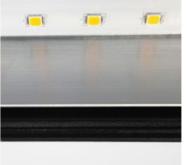

Aluminium Body

The Line Opal Recessed also features a body constructed of aluminium, available in either white or black powder coated finishes.

Heavy Duty Mounting Clips

The Line Opal Recessed includes heavy duty mounting clips, for simple and secure installation.

Glare Reduction

The Line Opal Recessed incorporates a deep set LED heat sink and a specialised opal diffuser. Combined, these provide a UGR of less than 22; therefore reducing glare and increasing visual comfort.

External Flicker Free Driver

The Line Opal Recessed features an external flicker free driver, which comes mounted as standard, for easy installation. This driver creates smooth dimming and flicker free lighting.

Suspension Lights

Suspension lights are suitable for lighting large spaces, as well as directing light onto a particular area. Suspension lighting has become a decorative addition to interior design, perfect for both individual use or clustered in a group. Extremely versatile, these pendants can transform the look and feel of any room.

Silo Suspension

The Silo Suspension has a simple yet sophisticated design, providing endless design opportunities. With various heights and diameters, the Silo Suspension allows you to create unique and dynamic lighting to your space.

Quick Connection System
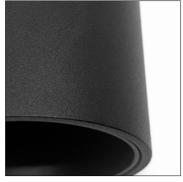

The quick connection system has been designed for ease and simplicity, allowing a fast and simple installation process. This allows for a seamless design that complements the aesthetic of the fitting.
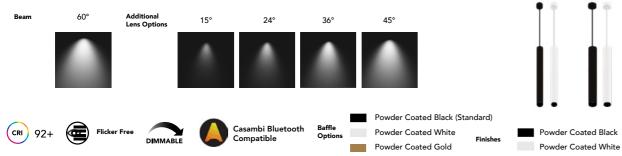

Advanced Lens Technology

The Silo Suspension features the latest in lens technology, guiding virtually every ray of light emitted by the LED. The lens improves the efficiency of the fitting, enhances visual comfort and dramatically reduces glare.

Slim, Modern Design

The Silo Suspension is designed with a modern aesthetic in mind. Created as a slim and modern lighting alternative for over a kitchen bench, table or in a cluster.

Designed for Versatility

The Silo Suspension series has been strategically designed to produce the best possible light, whilst also maintaining durability, sustainability and style. Available in either black or white, with various heights and widths; this pendant is ideal for accent lighting.

Make a Statement

The Silo Suspension creates the perfect lighting feature. Both functional and decorative, the Silo Suspension is extremely flexible in its design use.

Silo Suspension

Core Suspension

The Core Suspension provides yet another alternative to our suspension collection. The Core Suspension is a shorter, yet wider fitting compared to others in our range; providing an exceptionally high lumen output.

Track Lights

Track lighting allows for versatility and flexibility, the systems are made up of light fixtures attached anywhere along a continuous track that contains electrical conductors. This allows you to change or reposition any and all fixtures, even after installation. As track lighting is extremely controlled, it provides an ideal solution for accent lighting in both residential and commercial spaces.

3 Circuit Track

Three circuit track utilises 3 live copper conductors that allow 3 lighting circuits to be individually dimmed or switched on or off. When a track light is installed, it can be assigned to 1 of the 3 circuits via a dial.

A Versatile Collection

Our latest track lighting collection includes versatile options to suit any design and space.

The Faze Track Lighting Experience

As we have improved our collection, we have also improved the experience in which you select your track lighting components and fittings. This catalogue includes a user friendly selection guide that has all of your track options, components and fittings in one place. We have also included design ideas and inspiration, as well as a configuration guide to help ensure your track lighting is of the highest calibre in your next project.

Latest in Track Lighting Technology

Staying current with the latest in lighting technology, our track lighting systems are the latest from the Global 3 Circuit Track range.

3 Circuit Track Specifications

Use the following guide to assist in selecting the correct length of track you will require, as well as understanding load-bearing and mounting information.

Measurements and Specifications

Dimensions	**3 Circuit Track Dimensions** **Height** 32.5mm **Width** 31.5mm **Length** 1000mm and 2000mm available.	32.5mm H W 31.5mm Available in 1000mm and 2000mm
	3 Circuit Recessed Track Dimensions **Height** 32.5mm **Width** 56mm **Length** 1000mm and 2000mm available.	32.5mm H 31.5mm W 56mm Available in 1000mm and 2000mm
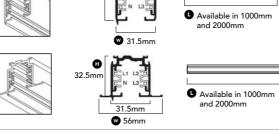

Mounting Guide

1000	250	
2000	250	1000

a b 12 4 a

L = TRACK LENGTH

Load Bearing Guide (Suspended Track)	If you place a wire suspension every meter as recommended, you can attach **25kg** to a meter of conductor rail and single weights up to **5kg.** If you only install a wire suspension every 2 meters, you may only attach **10kg** and single weights of only up to **1kg.**
Load Bearing Guide (Mounted Track)	When using surface mounted track you can attach up to **20kg.** However this will also depend on the ceiling type and the number and quality of screws fastening the track to the ceiling.

Finishes   ☐ White   ■ Black

Design Recommendations

Application Method	Reason for this application
Commercial lighting	Track lighting is a great way to light a commercial project, with one system carrying multiple fittings.
Retail lighting	Track lighting is a versatile option for retail lighting. Whether it's to showcase individual products, or to illuminate an entire store front. The ability to individually adjust each light fitting on the track system makes it a great option for shop owners and retail managers to adjust their lighting as often as required.
Residential lighting	Track can be an ideal option for dining room lighting. As well as complementing industrial style apartments, track lighting can be a modern option for new residential projects.

Quality System

We are always researching to stay up to date with current lighting technology. Because of this, the Global 3 Circuit Track system is unparalleled.

High Quality Aluminium Body and Construction

The Global 3 Circuit Track system is constructed with aluminium and features nickel plated copper leads, this ensures maximum protection against oxidisation.

Easily operated system, with complete control

The 3 Circuit Global Track makes it easy to adjust all aspects of your lighting set-up, with the ability to individually move and slide your fittings, as well as the option of 3 power settings.

Range of Components for Various Layouts

The 3 Circuit Global Track incorporates a wide range of components, options for various layouts, as well as the option to suspend your track via the wire suspension kit.

Track Components

Use the following guide to assist in selecting the correct components to build your track lighting design.

Component	Diagram	Description	Finishes	Product Code
3 Circuit Track Piece		3 circuit track, available in 1m or 2m lengths.	☐ 1m, White ■ 1m, Black ☐ 2m, White ■ 2m, Black	83-3C1MW 83-3C1MB 83-3C2MW 83-3C2MB
3 Circuit Recessed Track Piece		3 circuit recessed track, available in 1m or 2m lengths.	☐ 1m, White ■ 1m, Black ☐ 2m, White ■ 2m, Black	83-3CR1MW 83-3CR1MB 83-3CR2MW 83-3CR2MB
Feed Piece		The feed piece connects at the start of the track and supplies power to the entire track configuration.	☐ White ■ Black	83-3CFPW 83-3CFPB
Dead End		The dead end connects at the end of the track and completes the track with a clean finish.	☐ White ■ Black	83-3CDEW 83-3CDEB
Straight Connector		The straight connector joins two separate pieces of track together.	☐ White ■ Black	83-3CSCW 83-3CSCB
Straight Connector Feed		The straight connector feed connects in the middle of two track pieces and supplies power to the entire track configuration. You can use a straight connector feed instead of a regular feed piece.	☐ White ■ Black	83-3CSFW 83-3CSFB
Corner Connector		The corner connector is used to connect two pieces of track in a corner configuration. These pieces are available in both right and left. A corner connector also provides power to the track.	☐ Left, White ☐ Right, White ■ Left, Black ■ Right, Black	83-3CLCW 83-3CRCW 83-3CLCB 83-3CRCB
T Connector		The T connector is used to connect three pieces of track in a T configuration. A T connector also supplies power to the track.	☐ White ■ Black	83-3CTCW 83-3CTCB
Cross Connector		The cross connector is used to connect four pieces of track in a cross configuration. The cross connector also supplies power to the track.	☐ White ■ Black	83-3CCCW 83-3CCCB
Adaptor		The adaptor is a clip-in component which comes as standard on every Faze fitting. The adaptor is used to connect the luminaire to the track. The adaptor can carry fittings of 5kg or less.	☐ White ■ Black	N/A Pre-assembled on fitting.
Wire Suspension Kit		The wire suspension kit is used to suspend the track configuration.	☐ White ■ Black	83-3CWSUPW 83-3CWSUPB
Universal Fixing Piece		A universal fixing piece can be used to mount the track in a fixed position.	☐ White ■ Black	83-3CUFW 83-3CUFB

Please note:
3 circuit recessed track is configured using the same components as the standard 3 circuit track. However in addition to this, cover plates are required. Please get in touch with one of our design consultants for more information.

Track Layout and Connections

Use the following guide to assist in the construction of your track lighting design. You must ensure all track layouts include a power feed.

Notes when constructing a track system
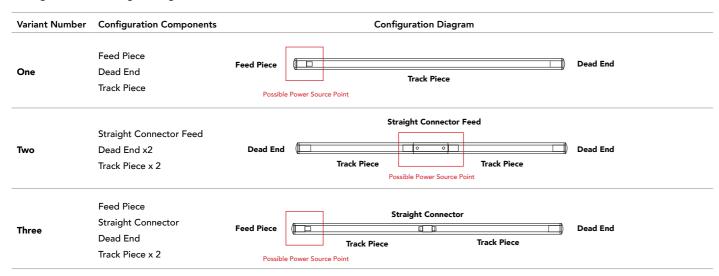

1	Never supply power to the track system in multiple locations. **Only use 1 power supply location.**
2	Make sure the track system is straight both vertically and horizontally before powering on.
3	The power supply on-site will determine which accessory is best to use and which location is appropriate for the power source.
4	Regardless of your track lighting design, 1 point of power source is required.

Possible Power Source Point
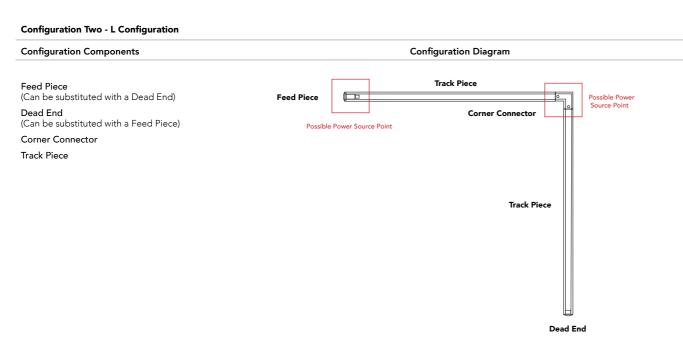

Possible Power Source Point
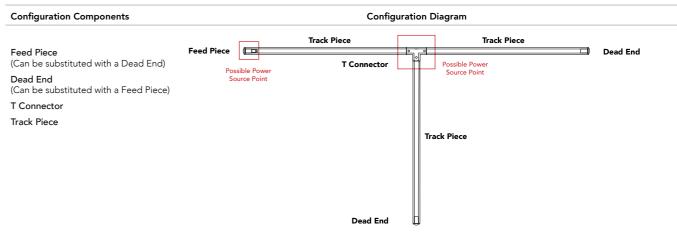

This indicates that a Feed Piece or Connector can be used at this point as the power source to the track.

Circular Track Design

The Vita Track is the perfect choice if you are looking for a circular design. With its minimal profile, it will fit seamlessly into any lighting project.

Refined Reflector

The Vita Track operates with an advanced reflector that produces the best quality light.

Specially Designed Circular Driver

The Vita Track showcases a unique phase-cut dimmable, circular driver with a power factor of 0.95. Specially designed for the Vita's circular structure, this allows a slimmer design.

High Lumen Output

The Vita Track provides a minimum output of 1140 lumens.

Slim and Modern Profile

The Vita has been designed to complement any modern space. With clean lines, a refined finish and minimalistic profile, the Vita Track is an ideal accent lighting solution.

Black, 4000K, 60°	**118-PR7MS11B604**
General Specifications	
LED	11W *operating wattage 12W
Lumens	880 lm (3000K) | 960 lm (4000K)
Efficacy	65 lm/w (3000K) | 72 lm/w (4000K)
Colour	3000K, Warm White 4000K, Cool White
Material	Powder Coated Aluminium
Finish	White | Black
Beam	15° | 24° | 36° | 60°
CRI	97+
IP	44
Colour Deviation	SDCM ≤2
UGR	<19
Lifetime	>55,000hrs L80B10
Warranty	7 Years
Driver Specifications	
Dimensions	L 98 x W 38 x H 24 mm
Power	300mA 240V Remote Flicker Free Dimmable Driver
Dimming	Phase Cut Dimming
Power Factor	> 0.90
DALI Dimming available upon request	
Reflector Codes	
15° Reflector	**118-RFLP15**
24° Reflector	**118-RFLP24**
36° Reflector	**118-RFLP36**

* When using C-Bus, use universal or trailing edge dimming modules

Compatible with remote Casambi CBU-TED Bluetooth Controllable Dimmer (71-CASCBU) & with Casambi BasicDim Driver 11W (71-CAS300)

Black, 4000K, 45°	**7-DA2M10B454**
General Specifications	
LED	10W
Lumens	600 lm (3000K) | 665 lm (4000K)
Efficacy	56 lm/w (3000K) | 62 lm/w (4000K)
Colour	3000K, Warm White 4000K, Cool White
Material	Powder Coated Aluminium
Finish	White | Black
Beam	45°
CRI	90+
IP	20
Colour Deviation	SDCM ≤3
UGR	<5
Lifetime	>54,000hrs L80B10
Warranty	5 Years
Driver Specifications	
Dimensions	L 104 x W 43 x H 24 mm
Power	600mA 240V Remote Dimmable Driver
Dimming	Phase Cut Dimming
Power Factor	> 0.90
DALI Dimming available upon request	

* When using C-Bus, use universal or trailing edge dimming modules

Compatible with remote Casambi CBU-TED Bluetooth Controllable Dimmer (71-CASCBU)

Cut Out
60*307mm

H 68mm

W 317mm
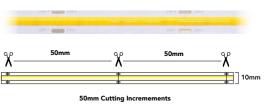

Dash 10 Light

General Specifications

LED	5W p/m | 10W p/m 24V DC
Lumens	5W p/m 330 lm (3000K & 4000K) 10W p/m 636 lm (3000K & 4000K)
Efficacy	66 lm/w (5W) | 75 lm/w (10W)
Colour	3000K, Warm White 4000K, Cool White
Material	Polyurethane
Finish	White
Beam	120°
CRI	92+
IP	68
Colour Deviation	SDCM ≤2
Lifetime	>54,000hrs L70B10
Warranty	5 Years
Lengths Available	1m | 3m | 5m rolls

Please note: Custom lengths are available upon request.
A minimum order quantity applies.

Bending Diameter	300mm

Compatible with remote Casambi CBU-TED Bluetooth Controllable Dimmer (71-CASCBU)

Casambi Setups

Through various components and control options, the Casambi system allows users to integrate Bluetooth into their current lighting and create lighting designs completely from scratch.
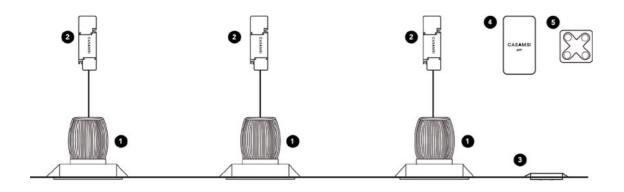

How to Connect

External Casambi unit

For exisiting installations or fittings with a built-in driver, an external Casambi unit is required. This unit connects to the current driver and is a cost effective way of making your existing installation Bluetooth compatible.

Driver with a built-in Casambi unit

For new installations it is best to use a driver with a built in Casambi unit. This allows for a direct connection to the luminaire and a simple installation process.

Examples of Casambi Bluetooth setups

① Fittings with individual Casambi drivers

1. Luminaire

This can be any of our compatible luminaires. In this example is a Faze Pro downlight.

2. Casambi Driver

This is the driver which has the Casambi unit built into it.

3. Sensor (Optional)

Sensors are an optional addition to your setup. These will allow for the motion based features in the Casambi app.
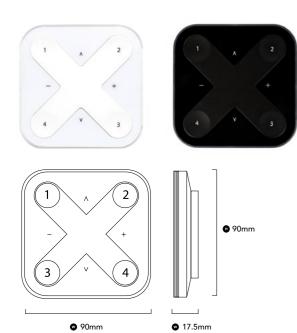

4. Casambi App

Available to download on Apple App store or Google Play, the Casambi app is the complete guide and controller to your Casambi Bluetooth setup.
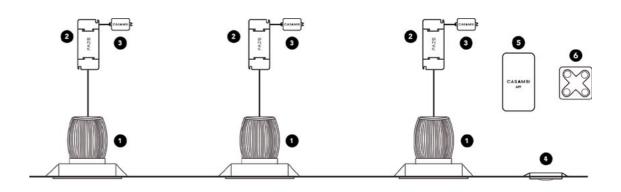

5. Casambi BasicDIM Wireless Switch (Optional)

The Casambi BasicDIM Wireless Switch is an alternative to using the app on your phone. It comes with a magnetic base, making it simple to mount to any wall or surface.

② Fittings with individual external Casambi units

1. Luminaire

This can be any of our compatible luminaires. In this example is a Faze Pro downlight.

2. Standard Faze Driver

This is the standard Faze dimmable driver that is included with the fitting.

3. External Casambi unit

The external Casambi unit which connects through the current drivers' connection.

4. Sensor (Optional)

Sensors are an optional addition to your setup. These will allow for the motion based features in the Casambi app.

5. Casambi App

Available to download on Apple App store or Google Play, the Casambi app is the complete guide and controller to your Casambi Bluetooth setup.

6. Casambi BasicDIM Wireless Switch (Optional)

The Casambi BasicDIM Wireless Switch is an alternative to using the app on your phone. It comes with a magnetic base, making it simple to mount to any wall or surface.

③ Multiple fittings running off of one external Casambi unit

Please note: This setup is only if you would like to control multiple light fittings all at once. You cannot individually control each fitting with this setup.

A capacity of 150W is applicable.

1. Luminaire

This can be any of our compatible luminaires. In this example is a Faze Pro downlight.

2. Standard Faze Driver

This is the standard Faze dimmable driver that is included with the fitting.

3. External Casambi unit

The external Casambi unit which connects through the current drivers' connection.

4. Sensor (Optional)

Sensors are an optional addition to your setup. These will allow for the motion based features in the Casambi app.

5. Casambi App

Available to download on Apple App store or Google Play, the Casambi app is the complete guide and controller to your Casambi Bluetooth setup.

6. Casambi BasicDIM Wireless Switch (Optional)

The Casambi BasicDIM Wireless Switch is an alternative to using the app on your phone. It comes with a magnetic base, making it simple to mount to any wall or surface.

Casambi Component Guide

It is essential when creating your Bluetooth lighting plan to ensure that you have selected the correct corresponding components. This guide will provide all the information on each component required for your Bluetooth lighting setup.

Casambi BasicDIM Wireless Switch

The Casambi BasicDIM Wireless Switch is an alternative to using the app on your phone. It comes with a magnetic base, making it simple to mount to any wall or surface.

Casambi Dimmer Module

The Casambi Dimmer Module is a Bluetooth controllable, Casambi enabled trailing-edge dimmer for operation of incandescent lamps, dimmable LED lamps and dimmable LED control gear.

Product Code

Casambi Dimmer Module	**71-CASCBU**
Casambi Dimmer Module (With CBU box)	**71-CASCBUBOX**

General Specifications

Voltage Range	85-240 VAC
Max. Output Current	0.65 A
Dimming Method	Trailing-edge phase control
Max. Output Power	150 VA @ 230 VAC 75 VA @ 120 VAC
Min. Load Requirement	1W
Max. Inrush Current	10 A, 100 ms
IP	20
Dimensions	40.4 x 36.3 x 14.0 mm
Lifetime	Up to 100,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	All Faze fittings, excluding LED Strip.

Features

- Available with or without CBU box.
- Trailing Edge Dimming.
- Can be controlled with Casambi app, available for iOS and Android devices.
- Can be installed behind a traditional wall switch, inside a luminaire or into a ceiling outlet box.
- Able to control up to 150 VA at 230 VAC.
- Features an overcurrent and over temperature protection.
- Dimmer module box comes with easy access lid for connecting supply on site.
- Loop in - loop out push fit connectors 20 to 12 AWG

Casambi BasicDIM Driver 11W

Dimmable built-in constant current LED Driver, for use with our 11W downlights.

Product Code

Casambi BasicDIM Driver 11W	**71-CAS300**

General Specifications

Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 – 264 V
DC Voltage Range	176 – 280 V
Max. Power Control	17W
Output Current	Set at 300 mA
Dimming Range	1 - 100%
IP	20
Dimensions	130 x 43 x 30 mm
Lifetime	Up to 50,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	Edge Mini
	Lite Mini
	Pro Mini Round
	Pro Mini Square
	Pro Adjustable

Features

- Can be either used built-in or independent with clip-on strain-relief.
- Forms automatically a wireless communication network with up to 250 nodes.
- Adjustable output current between 250 and 700 mA.
- Set to 300mA.
- Up to 86% efficiency.

Casambi basicDIM Driver 13W

Dimmable built-in constant current LED Driver, for use with our 13W downlights.

Product Code

Casambi basicDIM Driver 13W	**71-CAS350**

General Specifications

Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 – 264 V
DC Voltage Range	176 – 280 V
Max. Power Control	17W
Output Current	Set at 350 mA
Dimming Range	1 - 100%
IP	20
Dimensions	130 x 43 x 30 mm
Lifetime	Up to 50,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	Edge 100
	Edge 110
	Lite 108
	Pro Round
	Pro Square

Features

Can be either used built-in or independent with clip-on strain-relief.

Forms automatically a wireless communication network with up to 250 nodes.

Adjustable output current between 250 and 700 mA.

Set to 350mA.

Up to 86% efficiency.

Casambi BasicDIM Driver 20W

Dimmable built-in constant current LED Driver, for use with all of our 20W downlights.

Product Code

Casambi BasicDIM Driver 20W	**71-CAS600**

General Specifications

Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 – 264 V
DC Voltage Range	176 – 280 V
Max. Power Control	17W
Output Current	Set at 300 mA
Dimming Range	1 - 100%
IP	20
Dimensions	130 x 43 x 30 mm
Lifetime	Up to 50,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	Edge 135
	Lite 125

Features

Can be either used built-in or independent with clip-on strain-relief.

Forms automatically a wireless communication network with up to 250 nodes.

Adjustable output current between 250 and 700 mA.

Set to 600mA.

Up to 86% efficiency.

Casambi BasicDIM 24V Wireless 4ch Device

This device is the external Casambi unit for all 24V Faze LED Strip. It can control up to 150W and multiple fittings via an Android or iOS smart device.

Product Code

Casambi BasicDIM 24V Wireless 4ch Device	**71-CAS24V**

General Specifications

Supply Voltage DC	12 - 24 V
Max. Input Current	6A
Output Power 24V DC	144W
Output Power 12V DC	72W
Max. Power Control	150W
Radio transceiver operating frequencies	2.4 - 2.483 GHz
Max. Output power radio transceiver	+4 dBm
IP	20
Warranty	5 Years

Compatible Fittings

FAZE	All Faze LED strip

Features

Easily implemented RGB and colour temperature controls.

No need for an external gateway device.

Forms automatically a wireless communication network with up to 250 nodes.

Small form factor for luminaire installation.

Device firmware can be updated over-the-air.

4 PWM outputs.

Can control up to 150W.

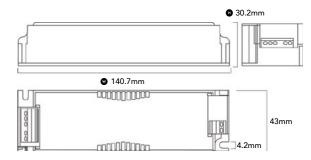

Casambi BasicDIM Driver 24V 35W

Dimmable 24V constant voltage LED Driver for flexible constant voltage strips up to 35W.

Product Code

Casambi BasicDIM Driver 24V 35W	**71-CAS24V35**

General Specifications

Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 – 264 V
DC Voltage Range	176 – 280 V
Max. Power Control	35W
Mains Frequency	0 / 50 / 60 Hz
Dimming Range	1 - 100%
IP	20
Dimensions	195 x 43 x 30.2 mm
Lifetime	Up to 50,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	All Faze LED strip

Features

Can be either used built-in or independent with clip-on strain-relief.

No need for an external gateway device.

basicDIM Wireless enables different dimming options.

Forms automatically a wireless communication network with up to 250 nodes.

Dimming range 1 to 100%.

No additional external dimmer is needed.
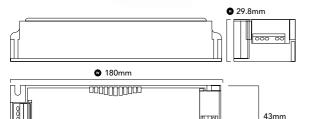

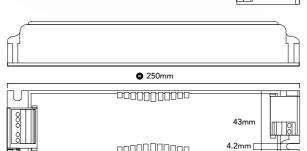

Can control up to 35W.

Casambi BasicDIM Driver 24V 60W

Dimmable 24V constant voltage LED Driver for flexible constant voltage strips up to 60W.

Product Code

Casambi BasicDIM Driver 24V 60W	**71-CAS24V60**

General Specifications

Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 – 264 V
DC Voltage Range	176 – 280 V
Max. Power Control	60W
Mains Frequency	0 / 50 / 60 Hz
Dimming Range	1 - 100%
IP	20
Dimensions	225 x 43 x 30.2 mm
Lifetime	Up to 50,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	All Faze LED strip

Features

Can be either used built-in or independent with clip-on strain-relief.

No need for an external gateway device.

basicDIM Wireless enables different dimming options.

Forms automatically a wireless communication network with up to 250 nodes.

Dimming range 1 to 100%.

No additional external dimmer is needed.

Can control up to 60W.

## Casambi BasicDIM Driver 24V 100W

Dimmable 24V constant voltage LED Driver for flexible constant voltage strips up to 100W.

Product Code

Casambi BasicDIM Driver 24V 100W	**71-CAS24V100**

General Specifications

Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 – 264 V
DC Voltage Range	176 – 280 V
Max. Power Control	100W
Mains Frequency	0 / 50 / 60 Hz
Dimming Range	1 - 100%
IP	20
Dimensions	295 x 43 x 29.8 mm
Lifetime	Up to 50,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	All Faze LED strip

Features

Can be either used built-in or independent with clip-on strain-relief.

No need for an external gateway device.

basicDIM Wireless enables different dimming options.

Forms automatically a wireless communication network with up to 250 nodes.

Dimming range 1 to 100%.

No additional external dimmer is needed.

Can control up to 100W.

Casambi BasicDIM Driver 24V 150W

Dimmable 24V constant voltage LED Driver for flexible constant voltage strips up to 150W.

Product Code

Casambi BasicDIM Driver 24V 150W	**71-CAS24V150**

General Specifications

Rated Supply Voltage	220 - 240 V
AC Voltage Range	198 – 264 V
DC Voltage Range	176 – 280 V
Max. Power Control	150W
Mains Frequency	0 / 50 / 60 Hz
Dimming Range	1 - 100%
IP	20
Dimensions	325 x 43 x 29.8 mm
Lifetime	Up to 50,000hrs
Warranty	5 Years

Compatible Fittings

FAZE	All Faze LED strip

Features

Can be either used built-in or independent with clip-on strain-relief.

No need for an external gateway device.

basicDIM Wireless enables different dimming options.

Forms automatically a wireless communication network with up to 250 nodes.

Dimming range 1 to 100%.

No additional external dimmer is needed.
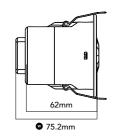

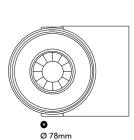

Can control up to 150W.

Casambi Flush Mount Pir Motion Sensor

Wireless sensor compatible with Casambi based systems.

Product Code

Casambi Flush Mount Pir Motion Sensor	**71-CASPIR**

General Specifications

Mains Voltage	220 - 240VAC 50/60Hz
Detection Range	(Ø x H) 9m x 3m (minimum)
Detection Angle	360°
Range	15 ~ 30m
Protocol	Bluetooth 4 Wireless Mesh
IP	20
Dimensions	Ø 78 x 75.2 mm
Application	Recessed/Flush Mount
Mounting Height	Max. 5m
Warranty	3 Years

Compatible Fittings

FAZE	All Faze fittings, excluding LED Strip.

Features

Compatible with Casambi.

Recessed/Flush Mount Application.

360° Detection Angle.

15 - 30m Bluetooth Transceiver Range.

UGR Defined

Unified Glare Rating (UGR) refers to the amount of glare emitted in a space. When it comes to UGR, there are certain parameters and standards set in place to ensure that it is accurate.

UGR is calculated through a specific formula. Below is a breakdown of the formula and how it uses the luminaire's details, the details of the space and the luminance around the luminaire to determine the UGR.

$$UGR = 8 \log \left[\frac{0.25}{L_b} \sum \left(\frac{L^2 \omega}{p^2} \right) \right]$$

Symbol/Value	Definition
UGR	Unified Glare Rating
log	Our eyes response to the light. *Our eyes respond 'logarithmically' to light.*
L_b	The background luminance.
$\sum$	To take all luminaires in the room into account.
L	The luminaire's total luminance.
ω	The solid angle of the luminaire from the viewers position.
P	Each luminaire's position from the line of sight of the viewer. (Guth position Index)

No luminaire can be referred to as a single UGR value, as this value will always alter depending on the luminaire's setting and surroundings.

All Faze UGR values in this catalogue are based on their recommended space values. For a more accurate UGR value it is recommended that you use our IES/LDT file for that luminaire in Dialux to determine the UGR in your specific space.

All of our Faze luminaires go through vigorous testing, this includes the UGR table (CIE 117-1995 tabular method) as part of our IES test reports. These can also be provided for determination of the correct UGR value.

These are the current reccomended UGR values according to the Australian standards (AS/NZS)

Type of Space	Recommended UGR
Technical Drawing/Design Offices	≤ 16
Offices (Tasks such as reading, writing, computer-based work)	≤ 19
Retail Trade, Sales Area, Reception Area, Cafeteria	≤ 22
Bathrooms, Toilets	≤ 25
Communication Areas, Foyers, Corridors	≤ 28

For more information on UGR please refer to our website or contact our lighting consultants at Radiant Lighting who can provide the IES/LDT file and UGR table for each fitting.

FAZE.
