# “LIGHTING THAT THINKS!”

Dear Reader,

Digitisation has already turned so much of life on its head. After spreading its influence throughout the music and film industry, it now has a firm grip on the fate of architecture. Modern building automation makes it possible for us to completely reorganise, manage and control our living and working spaces. “Smart Building” is the buzzword that symbolically denotes the progressive penetration of digital technology in our everyday life.

This unstoppable trend is fundamentally changing our industry. Unwilling to stand by as the passive victim, RIBAG has already embraced this wave of change. With “RibagAir” Smart Lighting we have created a foundation for the future that is characterised by sustainability, comfort and safety.

The latest generation of RIBAG lamps redefines the meaning of lighting comfort. Gone are the days of complex electrical installations and complicated light controls. RibagAir unites the smart RIBAG lamps in a wireless system that gives you a personal ambience and maximum freedom at any time, in any place. Now that is smart.

Opt for our pioneering lighting solutions and we’ll take you with us on our inspiring journey into the future.

Andreas Richner  
CEO

# RibagAir

smart lighting

Lighting has never been so easy  
and convenient.

**Brilliant and perfect:**

The way you can comfortably control the colour and intensity of the light with RibagAir is simply brilliant. Now you can enjoy maximum flexibility in designing your perfect lighting effect.

“AS INDIVIDUAL  
AS YOU.”

**Pascal Amacker, Creative Director**

**Quick and easy:**

Smart lighting concepts have never been so easy thanks to RibagAir. No complicated control wiring or programming.

“LIGHTING DESIGN  
HAS NEVER BEEN  
SO EASY.”

**Thomas Richner, Sales Manager**

**Networked without limits:**

RibagAir, with ZigBee technology, networks our lights wirelessly through Smart Home, so we can benefit from intelligent interactions with countless other systems.

“CONNECTED WITH  
THE WORLD.”

**Marcel Griessmann, Head of R&D**

**Smart is efficient:**

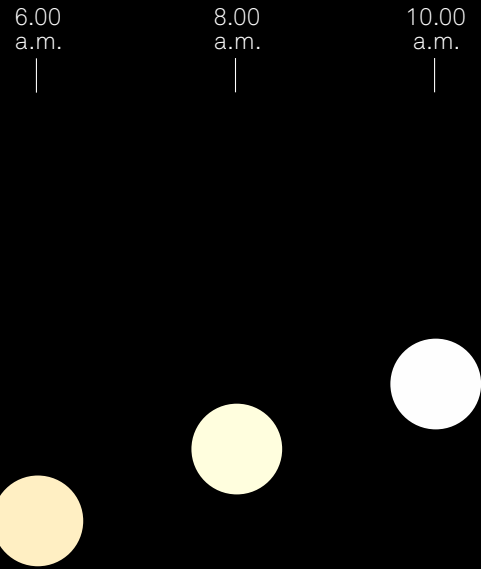

Saving energy and costs. Thanks to the clever wireless technology of RibagAir, you can plan, install and expand your lighting with ease – you can save a lot of energy.

“SAVING ON ENERGY  
AND COSTS.”

**Nicole Faltinek, Lighting Designer**

# With RibagAir for a personal ambience.

Life starts with light. In addition to its functional role, light also plays an important influential role on the way we feel. Early in the morning it is light that stirs our body into action, and late at night we seek soothing calm and quiet for a restful sleep. RibagAir reflects the diversity of emotionality and focuses on the biological effect of light.

Configure your lighting as you please using the app.

## Networked with your internal clock

RibagAir lamps automatically create the right light at the right time. Biodynamic lighting works like a timer for our internal clock and has a positive influence on our sense of wellbeing.

# VERTICO

RIBAG Design Studio

The graceful VERTICO lamp collection sets the tone of any setting. Whether it is for sophisticated place settings, a powerful presentation or an evocative staging full of atmosphere – VERTICO always accentuates the special highlights. The metal parts milled and finished from pure aluminium coupled with a timeless design capture the fascination. The unique ability of the light cone to focus with the greatest of flexibility fulfils the highest demands in lighting.

# LIGHTING TECHNOLOGY AT ITS MOST BEAUTIFUL

VERTICO is the first series of lamps to have a variable beam angle and adjustable lighting colour. The refined focus ring is the model's defining feature and the unifying design and functional element of the entire series. The lighting of any room can be brilliantly staged with just one lighting tool.

## Versatile lighting system

VERTICO is the ideal range of lamps for complete lighting solutions with distinct requirements. As a pendant, mounted and 3-phase track-mounted lamp or integrated in our proven METRON lighting system: VERTICO masters the challenges of lighting tasks with extreme precision and flexibility.

## Variable light

The specially designed lens made from high-quality glass creates a uniform distribution of light without any unnecessary waste. By using the focus ring, the angle of the beam can be freely changed from 20° to 60° for specific tasks or areas. The TunableWhite technology used in the RibagAir lamps from 2700 K to 5700 K, is characterised in any light colour range by a constant lumen package.

Focus ring to adjust  
the output of light

Variable light cone  
20° – 60°

# ARVA

Design Daniel Kübler

ARVA stands for universal lighting solutions. The rigorously designed lighting range is impressive due to the vast flexibility of use for a variety of lighting tasks. Adjusted to suit the spatial requirements, the pendant and mounted lamps are admired for their high light aesthetics.

reddot award 2016  
winner

# ARVA SIMPLIFIES LIGHTING DESIGN WITH AN UNDENIABLE COMMAND

As the world of architecture works more and more freely with its sophisticated living and working areas, so does ARVA become ever more the problem solver.

A consistent design, proportions that are carefully coordinated, sound materials and the latest in lighting technology combine to create professional lighting.

## Greater impact

ARVA pendant lamps and add-on elements with lens optics are truly impressive with this precise light distribution and complete non-glare quality. Whether at home, in a restaurant or club lounge, ARVA with lens optics and best lighting quality (CRI 95) brings the essentials into focus.

## Greater feeling of space

“Perfect lighting gives rooms more room.” The compactly arranged pendant lamps really impress with their pleasant direct (80%)/indirect (20%) distribution of light. Together with the universal mounted lamps, ARVA are an ideal combination of the highest lighting comfort and the lowest possible energy use.

# MESH

Design Daniel Kübler

MESH fulfills the demand for tailored lighting. If the meeting transitions seamlessly into a relaxed phase and vice versa, then lighting solutions to suit both contexts are required. With its high degree of individuality and ground-breaking lighting technology, MESH is the answer to the dynamic changes in our working environment.

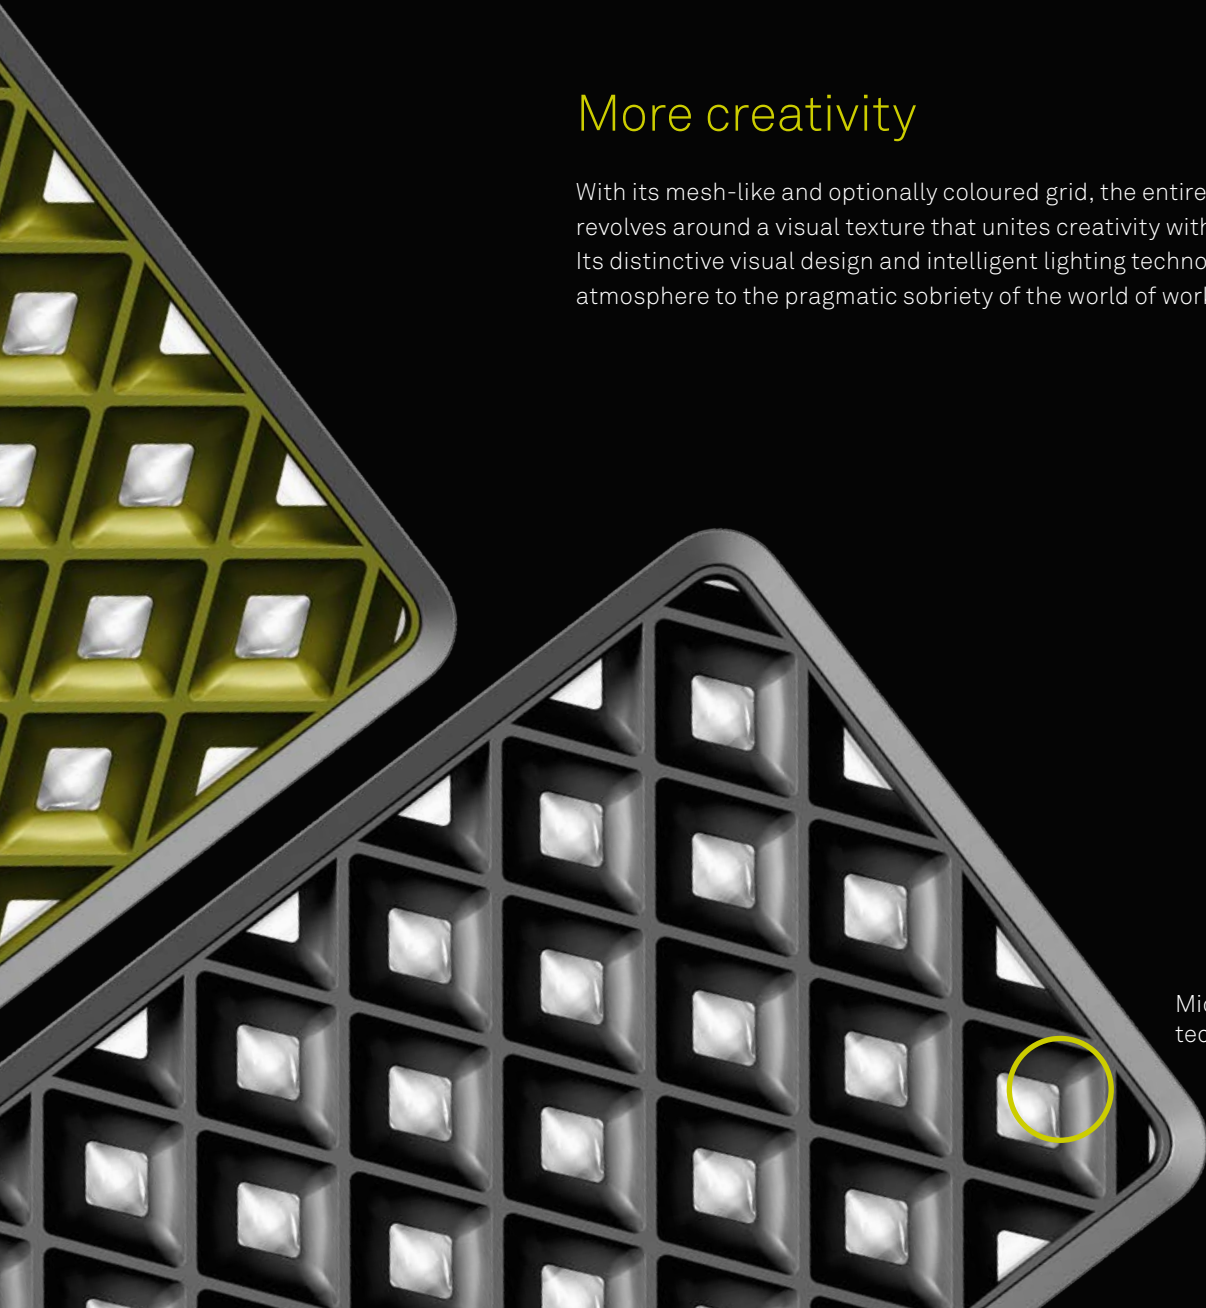

# THE NEW DIMENSION IN LIGHTING COMFORT

From the workstation to the conference room and reception area – as a pendant or mounted lamp, the pleasant lighting created by MESH never fails to please wherever it shines. With an impressive luminous efficacy of up to 140 lumens per watt, this innovative range of lamps is unrivalled in terms of its economic efficiency.

## More creativity

With its mesh-like and optionally coloured grid, the entire concept of MESH revolves around a visual texture that unites creativity with functionality. Its distinctive visual design and intelligent lighting technology lend a pleasant atmosphere to the pragmatic sobriety of the world of work.

Micro-lens  
technology

## More variation

The energy-optimised percentage of direct / indirect light (75% / 25%), the perfect anti-glare (UGR <16) and the variation in the colour and intensity of the light (2700 K to 5700 K) all ensure that demanding visual tasks are optimally fulfilled.

# VERTICO

## Pendant lamps

- Mounting: can be mounted on ceiling, black fabric cable 3 x 0.75 mm<sup>2</sup> (RibagAir), 5 x 0.75 mm<sup>2</sup> (DALI), length 2500 mm (order canopy or mounting rail separately)
- Lamp housing: brushed aluminium, natural, anodised black or champagne, polished chrome and white satin matt RAL 9003
- Optics: high-quality glass lens, fully adjustable focus from 20° to 60°
- LED: CRI 95, 2700 K, 3000 K, 4000 K or tunable white CRI 85, 2700 K to 5700 K (max. 30% lumen reduction with a variable beam angle)
- Service life: 50,000 hrs with 70% luminous flux
- Control gear: EB 230V/50 Hz, dimmable DALI or wireless control with RibagAir (ZigBee® remote standard)\*
- Lamp protection class: I
- Lamp protection level: IP 20
- Energy efficiency class A to A++, includes built-in LED lamps, lamps cannot be exchanged

4.0	1.4–4.2
5.0	1.8–5.2

## Accessories for pendant lamps

### Canopy for pendant lamps

- Canopy: brushed aluminium
- Colours: anodised natural, black or champagne, polished chrome or white satin matt RAL 9003 painted

Art. No.	Colour
4085.221.0	Natural
4085.221.2	Black
4085.221.9	Champagne
4085.221.3	White satin matt
4085.221.1	Polished Chrome

### Covering rosette for canopy

- Covering rosette: brushed aluminium
- Colours: natural, black, champagne-anodised, polished chrome or white satin RAL 9003 painted
- For large cable outlet openings up to Ø 75 mm
- Tool-free assembly between canopy and ceiling

Art. No.	Colour
4085.220.0	Natural
4085.220.2	Black
4085.220.9	Champagne
4085.220.3	White satin matt
4085.220.1	Polished Chrome

### Mounting rails for 2 or 3 pendant lamps

- Mounting rail: extruded aluminium section
- Colours: anodised natural, black satin matt RAL 9005 or white satin matt RAL 9003 painted
- Feed-through wiring: 5 x 1.5 mm<sup>2</sup>, for series mounting
- Compatible with the METRON system
- Connecting plate: order separately

Art. No.	Colour	Length mm
4085.222.0	Natural	800
4085.222.2	Black	800
4085.222.3	White	800
4085.223.0	Natural	1500
4085.223.2	Black	1500
4085.223.3	White	1500

\* Length without end plates

Optional accessories for the Metron system see page 142 in RIBAG general catalogue.

### Multi-adapter for 3-phase lighting track

- Housing: polycarbonate V0
- With protective conductor connection and phase selector
- With data bus option (ordered separately)

Art. No.	Colour
912.000.8	Metallic grey
912.000.3	White
912.000.2	Black

### Data bus for multi-adapter

- Electronic PCB for installation in a multi-adapter
- with SELV safety device

Art. No.
912.001.0

# VERTICO

## Mounted spotlight

- Mounting: can be mounted on the ceiling or wall
- Lamp housing: brushed aluminium, anodised natural or black or white satin matt RAL 9003 painted
- Function: 360° rotation and 90° swivel action
- Optics: high-quality glass lens, fully adjustable focus from 20° to 60°
- LED: CRI 95, 2700 K, 3000 K, 4000 K or tunable white CRI 85, 2700 K to 5700 K (max. 30% lumen reduction with a variable beam angle)
- Service life: 50,000 hrs with 70% luminous flux
- Control gear: EB 230V/50 Hz, dimmable DALI or wireless control with RibagAir (ZigBee® remote standard)\*
- Lamp protection class: I
- Lamp protection level: IP 20
- Energy efficiency class A to A++, includes built-in LED lamps, lamps cannot be exchanged

### Cavity adapter for ARVA add-on element

- suitable for mounting in suspended ceilings and installation housing (order control gear separately, refer to the control gears list)

Art. No.

4110.120.21.9

## PLANNING GUIDE

### Maximum number of lamps per control gear

Art. No.	Maximum number of lamps
915.010.500	1-2
915.012.500	1-2
915.024.500	1-5
915.035.500	1-7
915.035.500 DIG	1-7

Can be switched serial

Never switch parallel

In order to dim the DALI lights safely outside of a DALI lighting system, we recommend controlling the lights using a DALI dimmer (e.g. Feller, Osram, Jung, Gira), which is available from an electrical retailer.

For information on the lumen and wattage refer to the lighting measurement. The lighting technical data (LTD) is available as a download on our website.

There may be very narrow colour tolerances with LEDs. However, these are reduced to a minimum (<3 MacAdam).

# ARVA

## Add-on elements with lens optics

- Mounting: for mounting on the ceiling
- Lamp housing: diecast aluminium metallic grey RAL 9006, white satin matt RAL 9003, black satin matt RAL 9005 painted or polished chrome-plated
- Optics: high-quality glass lens technology with a beam angle of 60°
- LED: CRI 95, 2700 K, 3000 K and 4000 K, or tunable white 2700 K to 5700 K (CRI 85) with RibagAir\*
- Service life: 50,000 h with 70 % luminous flux
- Control gear: EB 230V/50 Hz, constant current 350 mA (order separately, see list of control gears)
- Lamp protection class: I
- Lamp protection level: IP 43
- Energy efficiency class A to A++, includes built-in LED lamps, lamps cannot be exchanged

### Cavity adapter for ARVA add-on element

- suitable for mounting in suspended ceilings and installation housing (order control gear separately, refer to the control gears list)

Art. No.  
4110.120.21.9

## PLANNING GUIDE

In order to dim the DALI lights safely outside of a DALI lighting system, we recommend controlling the lights using a DALI dimmer (e.g. Feller, Osram, Jung, Gira), which is available from an electrical retailer.

For information on the lumen and wattage refer to the lighting measurement. The lighting technical data (LTD) is available as a download on our website.

There may be very narrow colour tolerances with LEDs. However, these are reduced to a minimum (<3 MacAdam).

# MESH

## Pendant lamps

- Mounting: for mounting on ceiling, 2 nickel plated steel suspension cables, length 2500 mm, height is freely adjustable, black cable 3 x 0.75 mm<sup>2</sup> (RibagAir), 5 x 0.75 mm<sup>2</sup> (DALI)
- Lamp housing: extruded aluminium metallic grey RAL 9006 or white satin matt RAL 9003 painted
- Optics: micro-lens technology with grid structure, anti-glare according to EN 12464-1 (coloured matrix on request)
- LED: CRI 85, 3000 K or 4000 K or tunable white 2700 K to 5700 K
- Service life: 50,000 hrs with 70% luminous flux
- Control gear: EB 230V/50 Hz, dimmable DALI or wireless control with RibagAir (ZigBee® remote standard)\*
- Lamp protection class: I
- Lamp protection level: IP 20
- Energy efficiency class A to A++, includes built-in LED lamps, lamps cannot be exchanged

# RibagAir

## RibagAir – The modular Smart Lighting System

Central system nodes of the RibagAir Smart Lighting System are networked together with the ① **RibagAir-Gateway**, all the ② **RibagAir lamps** and ③ **ZigBee® wireless button** and connected with the outside world via the Internet. Without any control wiring.

The system can be individually configured and controlled via ④ **smartphone, tablet or webapp**.

RibagAir can be supplemented and extended with more home automation components based on the ZigBee® wireless standard, e.g. ⑤ **motion sensors or light sensors** etc. Thanks to the mesh-network style of wireless signal transmission, each lamp or system component acts like a signal repeater within the network.

Provided that a maximum distance between the devices of 20 m is respected, there is no limit to the range of the system (different building materials can affect the performance of the transmission).

RibagAir lamps can be incorporated and controlled in home automation systems (e.g. Ubisys, Wibus, Homee, Qivicon) or other Smart Lighting Systems (e.g. Philips Hue, Osram Lightify Pro, Smart-things) that support the ZigBee® wireless standard. For a regularly updated overview of the system compatibility visit: [www.ribag.com/ribagair](http://www.ribag.com/ribagair).

### \* What is ZigBee®?

ZigBee® is the world's first wireless and open wireless standard for home automation. The interoperability of the technology standards already meets the requirements for the future Internet of things. RIBAG, along with several hundred international companies such as Philips, Samsung, Bosch, Siemens and Kaba, use the ZigBee® Alliance for a single wireless standard.

For more information visit: [www.ZigBee.org](http://www.ZigBee.org)

For more information and answers to the most important questions about RibagAir and ZigBee® visit [www.ribag.com/ribagair/faq](http://www.ribag.com/ribagair/faq)

## INSTALLATION GUIDE

- The use of RibagAir lamps does not require any specific planning. The selection of ZigBee® wireless buttons is determined as usual according to the different functions of the room.
- When using battery-powered or self-powered ZigBee® buttons, you can enjoy the advantages of positioning them with a high degree of flexibility.
- The system is configured during the commissioning phase directly via an app or Webapp.
- The RibagAir Gateway can control an unlimited number of lights and ZigBee® components.
- A ZigBee® wireless button can usually control up to 20 RibagAir lamps.
- If RibagAir lamps are included in the home automation system (HA), the installation guide of the HA system provider applies.

### Key features of the RibagAir lamps and operating units:

- Can be switched and dimmed using the ZigBee® wireless button and RibagAir apps from system partners (see compatibility overview)
- Adjustable colour temperatures (2700 K to 5700 K) and brightness (0 – 100%) with high resolution.
- Synchronous reproduction of natural daylight (requires RibagAir Gateway).
- This ensures simultaneous control through light sensors.
- Lighting scenes, groups, timers etc. are configured by apps from system partners (depend on the respective app).

# RibagAir

## RibagAir compatible system components

### RibagAir Gateway

incl. Ethernet cable (2 m) and power supply unit

- LAN-ZigBee® base unit for the wireless system setup of RibagAir lamps and other ZigBee® system components
- Mounting: for mounting on the wall or set up freestanding
- Features: convenient configuration via Web interface, network configuration, unlock/lock from mobile devices, firmware updates, support access to share
- Frequency: 2.4 GHz
- Max. network participants: unlimited
- Power supply unit: 100 to 240V AC/50 to 60 Hz, output voltage: 5 VDC, 1A, standby power consumption: max. 0.8 W
- Degree of protection: IP20
- Dimensions: 106 x 106 x 26 mm
- System compatibility: suitable for controlling all RibagAir lamps as well as third party Zigbee® certified components

Art. No.	Colour
900.000.100 AIR	Black/aluminium

### ZigBee® wireless button (scene)

for the multi-functional control of RibagAir lamps

- Mounting: for mounting on the wall (screw/glue) or as a hand switch
- Features: on/off/dim/stores up to four lighting scenes, search and addition of max. 20 lamps
- Options: replaceable button mounts and frame from a well-known German switch manufacturer
- Frequency: 2.4 GHz
- Nominal voltage: DC 3V
- Batteries: incl. 1x lithium CR 2450 N (service life 50,000 Clicks)
- Transmission power: max. 10 mW
- Degree of protection: IP20
- Dimensions: 80x80x13.5 mm

Art. No.	Colour	Voltage
900.000.110 AIR	White	3V battery

### ZigBee® switch/button concealed module

for the multi-functional control of RibagAir lamps

- Mounting: for mounting on the wall (concealed module) behind every conventional light switches or buttons (no KNX/EIB), connection of up to four individual switches/buttons
- Features: on/off/dim/stores scenes and groups
- Frequency: 2.4 GHz
- Nominal voltage: 230 V/50 Hz
- Degree of protection: IP20
- Dimensions: 47 x 43 x 12 mm
- System requirements: RibagAir Gateway

Art. No.
900.000.111 AIR

### ZigBee® sensor

for detecting movement and light

- Mounting: for mounting on the wall or set up freestanding
- Features: motion detector (PIR, 6 m distance, 45° range), light sensor
- Frequency: 2.4 GHz
- Nominal voltage: DC < 2.5V
- Battery mode: incl. 1x lithium CR 123 (service life 3 years with signal)
- Transmission power: max. 10 mW
- Degree of protection: IP30
- Dimensions: 82 x 82 x 28 mm
- System compatibility: ZigBee® Home Automation Systems

Art. No.	Colour	Voltage
900.000.120 AIR	White	3V

### App for RibagAir

App features in combination with RibagAir Gateway:

- Automatic transfer of lighting professionals
- Grouping of lights
- Control at building level
- Control at room level
- Control of individual lights
- Lighting scenes can be defined
- Timer-controlled control
- Automatic sequences can be programmed
- Precise control of the brightness and colour temperature
- Can be extended as a Home Automation System

Detailed application features and compatibility with third party systems listed on [www.ribag.com/ribagair](http://www.ribag.com/ribagair).
